

## Submersible Water Feature Pump Series

### INTRODUCING THE NEW WGFP SERIES PUMPS

Little Giant is proud to announce the newest members of the WGFP Series family. The 2011 Submersible Water Feature Pump Series includes the addition of two powerful pumps, extending flow range from 2,300 to 14,000 gallons per hour.

Manufactured to exact specifications, Little Giant Water Feature Pumps provide efficiency and long life. The stainless steel cylinder houses a powerful PSC motor and includes ranges from 1/5 to 2 horsepower. The direct-drive system produces greater starting torque for instantaneous flow.

Perfect for use with Little Giant Skimmers and Waterfalls.

### FEATURES AND BENEFITS

#### **Submersible Water Feature Pump**

Ideal for powering water features and pond filtration systems with flows from 10,000 GPH to 14,000 GPH

#### **Heavy-Duty, Stainless Steel Motor Housing**

To assist in cooling motor to extend the life of the pump

#### **Clog-Resistant Design**

Capable of passing solids up to 1" diameter

#### **Continuous Duty Rated**

For operating in the most rigorous of feature applications

#### **Energy Efficient PSC Motor**

Producing only 1210 to 1700 Watts

#### **Professional-Grade Sealing**

Double mechanical and single radial-lip shaft seals

**LittleGIANT®**
