

CROOK

13

USES & APPLICATIONS

This is designed using the traditional 'shepherd crook' design to easily hook onto the casualty. The design and stainless steel material makes this a very durable hooking tool. It is safe for human, animals and general retrieval.

HOW TO USE

The sleeved fitting is designed to slide over the pole top fitting which secures it in place using a double sprung button mechanism. Use by extending the pole to the casualty with or without the clamping float (depending on distance). Once engaged, normal procedure applies.

MAINTENANCE & PRECAUTIONS

The sleeve fitting should be regular tested on the pole top fitting as damage will render the attachment from securely fitting.

SPECIFICATIONS

- Material: Stainless Steel
- Width: Opening distance of crook 12.5cm
- Length: 32cm
- Weight: 290g
