

USB Accessories

Each ASP lighting product is part of a total lighting system. ASP illumination tools are complemented by cases, belt carriers and a tactical training program. USB Accessories are an integral part of the ASP Lighting System.

Each family of ASP lights (Every Day Carry, Transitional, Duty, Strategic) has a rechargeable Lithium-ion component. All ASP rechargeables employ micro USB charge ports. Micro USB is the world standard for cell phones. This means that ASP USB lights can be recharged using ASP car chargers, wall chargers, a computer or a micro USB cell phone charger. 18650 rechargeable lights also accept two CR123A Lithium primary cells. ASP calls this feature Dual Fuel Technology.

ASP chargers are exclusive. They were custom designed by ASP. Each incorporates a blue status light to indicate a live power source. Each has integral finger ribs to aid removal. Chargers are available for car outlets, US wall outlets and European Union wall outlets. A Keystone, Micro Flex and Retractable connect to lights.

Interconnecting transport cases are available for AAA, AA, 14500, CR123A, 16340 and 18650 batteries. Link™ cases allow an officer to carry a variety of battery types (AAA, AA, 10440, 14500, CR123A, 16340, 18650) or interconnect any number of a specific battery.

ASP USB Accessories are exclusive, innovative and practical. Each is designed for a specific purpose. Each enhances the performance and functionality of ASP illumination tools.

- Exclusive Designs
- Industrial Performance
- Cross Platform Compatibility
- Lithium Power Based
- Micro USB Based

USB Accessories . . . Creating Brilliance

Car Charger

A USB charge converter with blue LED indicator for 12v vehicle power sources.

Wall Charger (US)

A USB charger with blue LED indicator for two blade North American wall sockets.

Wall Charger (EU)

A USB charger with blue LED indicator for two pin European wall sockets.

Retractable & Retractable Plus

A USB to micro USB retractable connecting cord with reversible plugs.

Micro Flex

A flexible micro USB extended connector with reversible plugs in a protective keyring carrier.

Keystone

A USB to micro USB miniature connector with reversible plugs.

Charge Bank

A micro USB or 12v car outlet charger for 18650 power cells.

Charge Dock

A magnetic charger for 18650 power cells that attaches to any micro USB charge cord.

AAA Battery Link

An interconnecting protective case for AAA Lithium power cells.

AA Battery Link

An interconnective case for protection of AA Lithium power cells.

CR123A Battery Link

An interconnecting protective case for CR123A Lithium batteries.

18650 Battery Link

An interconnective carrier to protect 18650 rechargeable Lithium-ion power cells.

14500 Battery Link

An interconnecting case to protect your 14500 rechargeable Lithium-ion power cell.

16340 Battery Link

An interconnecting case to protect 16340 rechargeable Lithium-ion power cells.
