

Pocket Knives

ASP Pocket Knives are designed for Every Day Carry (EDC). Each is a precisely engineered utility tool that is designed to be readily at hand.

ASP blades are produced from the finest stainless steel. They are forged to shape, then hand ground, mirror polished and precisely honed to a razor edge. Each knife fits conveniently in the pocket or on a keyring.

- **Pen Blades** are hollow ground with a razor edge.
- **Serrated Blades** are cut in a two over one pattern. Each incorporates a miniature **Liner Lock**.
- **Drivers** are patterned to fit both slotted and Phillips screws. They incorporate an EDM **Nail File** and **CM Scale**.
- **Handcuff Keys** are back set for rapid location of a keyway.
- **Scissors** incorporate a frame mounted return spring.
- **Sharpeners** are diamond coated and produce a razor edge or serration.
- **Openers** combine a miniature **Phillips Driver** with a bottle cap release and **Wire Stripper**.
- **Split Rings** allow attachment to a keychain. Optional **Clips** may be quickly removed.
- **Detachable Clips** allow attachment and convenient removal of knives.
- **Black Scales** are designed for laser engraving of a company or agency logo.
- **TSA (Turn, Sharpen, Attach)** tools are designed for carry on commercial aircraft. They have safety scissors, but no blade.
