

Raven AAA

The Raven AAA has the dimensions and feel of a fine writing instrument. It is easily carried in a suit, shirt or pants pocket. The rear button activation is instantly accessible.

The Raven is a two level light. There are no complex settings, elaborate activation codes or secret functions. A simple push of the rear mounted activation button provides brilliant intermittent or constant illumination. A double tap gives instant access to a low output second level.

The uniqueness of the Raven is the amount of technology that has been compressed into the form factor. Each Raven is built to professional law enforcement standards. Black hardcoat anodized controls are accented with a forged steel pocket clip. A precision TIR lens is optically clear. A constant current circuit board drives a room filling Cree XPG led. A sensor regulated heat management system controls the body temperature of the light. The eight facet Raven body fits securely in the hand, yet it is fabric friendly.

- Black Type III Hardcoat Anodizing
- Eight Facet Body
- Forged Steel Pocket Clip
- 140 Lumens (ANSI Standard)
- 2 Hour Run Time
- 15 Lumen Low Level
- Double Tap Activation

Easily carried. Conveniently clipped. Incredible intensity at the touch of a button. The ASP Raven. Simply Brilliant.

Raven AAA . . . Simply Brilliant

Background

Designed to professional law enforcement standards
Aerospace aluminum construction
Precision machined
No sharp edges
O-ring sealed for maximum water resistance
Eight facet profile

Specifications

Length	5.75"	14.6 cm
Diameter	.62"	1.6 cm
Weight	1.6 ounces	45 grams
	(with batteries)	
System	3 volt	
High Output	140 lumens (ANSI Standard)	
High Output Run Time	2 hours	
Low Output	15 lumens (ANSI Standard)	
Low Output Run Time	16 hours	

Body

Eight facet polymer grip
Steel frame
Coated threads for durability

Pocket Clip

Forged steel
Replaceable

Power Cells

1.5 volt Lithium AAA (two)
PTC protected
Safety vent
Ten year shelf life
Leak proof
Vibration resistant

Switch

Back mounted
Machined aluminum
Hardcoat anodized
Quick and positive location under stress
O-ring sealed activation button
PC board positive circuit contact
Sensitive and quiet activation
Self-cleaning (no carbon buildup)
O-ring sealed cover

Reflector Assembly

Extremely durable
Total internal reflective (TIR)
Computer calculated
Room filling illumination
Optically clear
Gasket sealed

LED Assembly

Proprietary heat management
Custom driver
Smart chip technology
Gasket sealed

Warranty

Limited Lifetime

AAA Lithium Power Cells
are available worldwide. ASP Link™ cases provide battery protection and storage.

Zippered Cases provide convenient storage for ASP products. These ballistic weave nylon carriers are available in a variety of colors and sizes to identify and protect ASP accessories.
