

## RESCUE THROWBAG

### USES & APPLICATIONS

This rescue device comes with a 20m, 25m or 30m rope stuffed loosely and can be used from land, boat or any stable platform.

### HOW TO USE

The throw bag is tossed to a person from a stable position into swift water/rapids enabling the swimmer to grab the rope and get pulled to safety.

### MAINTENANCE & PRECAUTIONS

Check terminal bag knot. Air the rope after use to dry. Ensure the rope is correctly packed to allow correct deployment.
