## mssseas mss544 VoyagerPDF"

## VoyagerPDF ${ }^{\circledR}$ is the hand-held, single-line laser scanner that offers aggressive scanning of all standard 1D bar codes, including PDF.

Metrologic's VoyagerPDF maximizes checkout efficiency with aggressive scanning of all standard 1D bar codes, including PDF codes. VoyagerPDF is also well-suited for light manufacturing and warehouse applications.

Metrologic's VoyagerPDF (models MS9524 \& MS9544) combines the ability to decode PDF bar codes with many of the outstanding features found in all Voyager series hand-held, single-line scanners - the industry benchmark for value and performance.

Both models decode the following bar codes: standard 1D, PDF417, PDF417
truncated, micro PDF, macro PDF and RSS-14 composite.

Since VoyagerPDF decodes bar codes featured on United States drivers' licenses, it is ideal for identityverification applications.

In addition to automatic infrared activation for bar code detection, VoyagerPDF (model MS9544) also comes equipped with Metrologic's patented CodeGate ${ }^{\circledR}$ technology which completes data transmission with the push of a single button.

VoyagerPDF models come with a stand and in-stand auto-detection technology for presentation scanning.

## Features

## - Decodes PDF417

## - Automatic trigger

- CodeGate data transmission
- High speed scanning
- FlashROM

## Benefits

Ability to decode PDF417, PDF417 truncated and micro PDF
Use scanner as either a hand-held device or a fixed presentation scanner when mounted in the stand

Zero in on desired code and complete data transmission with the push of a single button - Ideal for menu-scanning applications system

Industry leading scan speed (180 scans/second) maximizes productivity by increasing throughput

Protects POS investment with free firmware updates via MetroSet ${ }^{\circledR}$ 2 software and standard PC
