

**EasyID™** Powered By TotalFreedom™

**Metrologic's EasyID software plug-in parses bar code data found on government-issued identification card for applications involving age verification or automatic electronic form population.**

Powered by Metrologic's TotalFreedom™ open-system architecture, EasyID eliminates the need for host system software to process the encoded information contained within 1D and 2D barcodes on documents such as military issued IDs, driver's licenses and driver's permits.

EasyID can be pre-installed on select Metrologic imaging products or

purchased as a standalone upgrade. After installing the plug-in, a simple programming sequence enables you to transmit up to 24 data fields in any order you choose. Separate fields by selecting one or more standard ASCII character as your field delimiter.

When you enhance a Metrologic imager with EasyID, you've just taken an important step toward protecting your company and increasing efficiency.

**Compatible with the following Metrologic products:**

-  MS7580 Genesis™
-  MS1690 Focus™
-  MS1633 FocusBT™
-  MS1890 Focus™
-  IS1650
-  IS4920

**Reduce Transaction Time by 95%**

It takes the average person approximately 45 seconds to manually enter license data. In the 2 seconds it takes to scan a license's bar code, EasyID achieves the same result.

**Eliminate Data Entry Error**

The average person makes one error for every 20 words typed. EasyID eliminates these costly errors by automatically populating electronic forms.

**Reduce Liability**

EasyID takes the guesswork out of age verification, reducing the likelihood of selling age-restricted products to under age purchasers.

**Achieve Regulatory Compliance**

Comply with HIPAA patient confidentiality regulations and other state and federal regulations regarding the acquisition of personal information by configuring EasyID to parse bar code data and remove sensitive information from being transmitted to the host system.

## EasyID in Action

Use EasyID in a wide variety of industries such as retail, health-care and financial services to quickly and accurately populate an assortment of forms including:

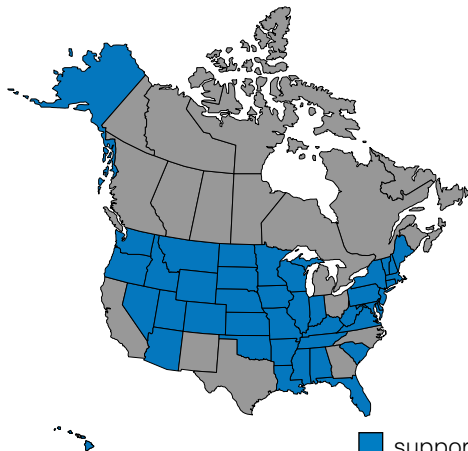

- Employment applications
- Bank account applications
- Patient admittance forms
- Registration forms
- Loyalty program/membership applications
- Credit applications

Automatically populate electronic forms in a single scan

### SUPPORTED IDs

United States Driver's Licenses	AK	IL	ND	TN
	AL	IN	NE	UT
	AR	KY	NH	VA
	AZ	KS	NJ	VT
	CO	LA	NV	WA
	CT	MA	NY	WI
	DC	MD	OK	WV
	DE	ME	OR	WY
	FL	MN	PA	
	HI	MO	RI	
	IA	MS	SC	
	ID	MT	SD	

### FORMATTING OPTIONS

Typical Data Fields	First Name	Weight
	Middle Name	Eye Color
	Last Name	Hair Color
	Date of Birth*	Gender
	ID Expiration Date*	Customer ID
	ID Issued Date*	ID Number
	Street	Class
	Street 2	Restriction
	City	Endorsements
	State	IIN
	Postal Code	Duplicates
	Height	Organ Donor

\* Date fields can be transmitted as MM/DD/YYYY or MMDDYYYY

Field Delimiters	Standard ASCII characters
	Popular field delimiters include comma, tab, carriage return, dollar sign, carrot, semicolon and space

### PRODUCT NUMBERS

<b>MS7580 Genesis</b>	AMS-75XX-SWIDB
<b>MS1690 Focus</b>	AMS-16XX-SWIDB
<b>MS1633 FocusBT</b>	AMS-16XX-SWIDX
<b>MS1890 Focus</b>	AMS-16XX-SWIDB
<b>IS1650</b>	AMS-16XX-SWIDB
<b>IS4920</b>	AMS-4920-SWIDB

The above part numbers include software plug-in only.

\*Variations exist within different ID formats that some versions may contain encrypted data that cannot be processed by EasyID. These codes, when read, could negatively impact system performance if the unit is not configured to ignore these codes.
