

Ethernet Made Easy

Innovative Cognitive printers lead the pack with network and mobile network ready e+Solutions. For small and intermediate size network installations where small size and low price point are key factors, e+Solutions offer the only internal ethernet ports in the industry. For applications from warehouses to hospitals, e+Solutions make network printing fast and easy.

Get inControl

Designed for network administrators by network administrators, *inControl* presents critical network information in an intuitive graphical interface. Only *inControl* has the ability to create printer profiles so that adding a new printer to the network is as easy as plugging in the printer and clicking a few buttons. Upload firmware, fonts, images, and label formats for every printer on the LAN, WAN, or Mobile Network. *inControl* puts the administrator in control.

Cognitive e+Solutions are the only desktop printers with the ethernet inside! Maintain a low-profile and a low price point with small footprint, sleek looking e+Solutions printers!

Internal ethernet ports make installation easy!
