

Go Further With Captuvo

Extended battery life makes Captuvo sleds ideal for the retail environment.

The durability of Captuvo sleds helps ensure continued service in the field.

Integrated imagers help deliver the accuracy needed in the healthcare industry.

The ease, comfort and performance of Apple. Now ready for the enterprise.

From checking emails and texts to capturing photos, feature-rich Apple® iOS devices have found their way into the workplace. But when iOS devices are deployed in a more challenging environment — such as direct store delivery, field service, or hospitals — daily threats like drops on concrete, dirt and dust, and harsh disinfecting chemicals test their durability.

Until now. Captuvo™ enterprise sleds integrate with Apple® iOS devices to deliver enhanced durability, longer battery life, and greater performance for the demanding environment of enterprise. When your iOS device is paired with a Captuvo sled, you can confidently deploy a solution built to last in tough places for a full shift and beyond. You'll never need to compromise on the speed and productivity of your mobile workforce.

Make The Most Of Your iOS Mobile Solution

Honeywell's Captuvo enterprise sleds can increase profitability through enhanced productivity and accuracy. Maximize your enterprise's mobility with Honeywell to get a greater return on your hardware investment and lower the total cost of ownership.

The Captuvo Enterprise Advantage

FEATURE	BENEFIT
Designed to withstand multiple 1.2 m (4') drops to concrete, all axis under room temperature	Better drop survivability means: <ul style="list-style-type: none"> • Less downtime from device failures • Higher employee productivity • Reduced spare pool investment
Reads standard 1D, PDF, 2D, Postal and OCR symbologies	Advanced decode capabilities means: <ul style="list-style-type: none"> • Fast and accurate reading of a wide range of barcodes • Improved motion tolerance • Superior end user ergonomics
Removable Lithium-ion battery	Long-lasting replaceable battery means: <ul style="list-style-type: none"> • Users can conduct multiple tasks, including scanning, throughout a full shift • Easily swap battery for continuous use

A Crash Course In Convenience

Captuvo sleds are designed to hold up to the rigors of daily business demands and deliver a wide range of benefits.

Drop Survivability

With many mobile devices supporting mission-critical applications, the impact of device failure on customer service, productivity and revenues can be significant. Captuvo sleds are built to survive in working conditions where drops are common, and can lower the failure rate of iOS devices by as much as 80% compared to other sled solutions.

Longer Lifecycle

Mobile solutions purpose-built for enterprise help prevent unplanned downtime that can threaten customer satisfaction and can provide a total cost of ownership advantage by offering longer replacement cycles and lower service costs. Plus, with Honeywell Repair Service programs, you can choose from coverage options that give you the highest levels of productivity, device reliability and uptime. That's what Captuvo sleds deliver.

Effective Data Capture

Honeywell Captuvo enterprise sleds with integrated imagers are ergonomically designed for worker comfort and ease of use in repetitive workflow applications. Plus, they offer improved motion tolerance and can quickly and accurately read a wide range of barcodes quickly and consistently.

Longer Battery Life

Wireless communications, barcode scanning, and portable printing all place a burden on batteries in mobile computing applications. Captuvo enterprise sleds have power management advantages to help batteries last the length of the shift.

BOOST PRODUCTIVITY AND ACCURACY IN:

Field Service

- Order management
- Stock valuation
- Receiving
- Inventory maintenance
- Loss prevention
- Asset protection

Retail

- Customer engagement
- Price/inventory checks
- Loyalty apps
- Item locator
- Price management
- Line busting
- Clienteling
- E-coupons
- Cross channel fulfillment
- Gift registry lookup
- Stock outs

Direct Store Delivery

- Pre-sales
- Customer engagement
- Order management
- Stock replenishment
- Merchandising
- Price checking/ markdown
- Returns management

Warehouse/ Fulfillment Center

- Picking
- Packing
- Inventory management
- Shelf stocking
- Quality audit
- Receiving

Healthcare

- Admissions
- Acute medication administration
- Specimen collection
- Point of care
- Pharmacy & lab
- Materials management
- Converged device

Seattle Seahawks Score with Captuvo

Customer Profile:

Professional American football franchise; Seattle, WA

Industry:

Retail

The Challenge:

In National Football League (NFL) pro shops, every home game is like Black Friday with a limited amount of time to sell as much merchandise as possible. Fans get frustrated with long lines, and the teams know that long lines sometimes deter shoppers entirely, or force others to walk out of the store after waiting too long.

The Solution:

To meet this challenge, the Seattle Seahawks deployed Honeywell's Captuvo SL22 sleds, which transform the Apple iPod touch into a mobile retailing tool that can speed up transaction time and increase associate productivity. With the fast and efficient barcode scanning and payment processing capabilities of the Captuvo SL22, the pro shop reported record sales with virtually no lines during the season's grand opening event.

“To speed up transactions, we went with the Honeywell Captuvo iPod POS sled, which has a built-in barcode scanner and credit card reader. From start to finish, the average three to four item sale takes less than a minute,”

— **Nick Johnson**,
IT specialist for the Seattle Seahawks.
