

Liquor Clicker Security Seal Instructions

After placing the Liquor Clicker on a bottle, take note as to how the security strap hangs below the rubber base and along the neck of the bottle.

The lip at the bottom of the security strap (A) should be the guide you use as to where the bottom of the security seal is to lay when placing the seal onto the bottle.

Wrap the security seal around the neck of the bottle, over the security strap and rubber base, like the picture below. Make sure to tightly squeeze the security seal for maximum adhesion.
