

Warranty Information

The warranty on defective pour spouts is 30 days from the date of purchase. Broken pourers will be exchanged promptly.

When cared for as instructed, portion spouts will provide years of trouble-free use and reduce liquor costs by eliminating overpouring.

**** DO NOT TEST ACCURACY OF PORTION SPOUTS USING WATER****
SINCE WATER HAS A DIFFERENT SPECIFIC GRAVITY THAN ALCOHOL. THE PORTION SIZE WILL NOT BE CONSISTENT.

This has a clear top with a built-in sanitary screen to protect your bottles from insects

Pour Spout Instructions

Alcohol Controls.com

Directions

To Install and Remove Pourer

1. To install Pourer: Wet Cork, shake off excess water, push straight into liquor bottle
2. To remove pourer: twist while pulling the spout up and out the bottle

How to Pour:

1. In order to get an accurate portion size, bring the spout to the edge of the drinking glass before tilting the bottle to pour.
2. Lift the back of the bottle to at least 45 degree angle with natural pouring motion.
3. You may have bartenders view the pouring video clip on the portion spout page of our website.

Additional Information

- If cork fins flatten over time, hold the cork portion under warm water for 30 seconds, then run under cold water. This will straighten out the fins.
- Plastic liquor bottles are not recommended to be used with portion spouts since they can be squeezed to pour more than the designated portion.
- Liquor bottles with wider-than-normal necks, like Patron, need portion spouts with an oversized cork to prevent leakage.
- You can add flip tops to portion spouts to prevent insects from entering the bottle.

** For best results, train your staff how to pour correctly with the portion spouts and properly clean spouts to maintain their pouring effectiveness.**

Washing Details

Before using pour spouts for the first time

- Soak in warm, soapy water for 15-30 minutes
- Rinse thoroughly in cold water.

To Wash Regularly

- Soak in warm, soapy water and rinse in cold water
- Do not wash portion spouts in hot water and never put in dishwasher.
- Spouts placed on cordials and liqueurs that contain sticky sugars must be washed every day to prevent clogging and breakage.
