

ASBESTOS TEST KIT

Asbestos is a health hazard in many homes, offices and schools. Asbestos exposure can cause lung cancer. An estimated 20,000 people will die each year for the next 30 years from asbestos exposure. **PRO-LAB'S PROFESSIONAL ASBESTOS TEST KIT** offers a laboratory test which identifies asbestos fibers to as little as 1% content by weight, using Polarized Light Microscopy. Laboratory results within 2 weeks. \$15.00 lab fee required. Express service is also available for an additional fee.

PESTICIDES IN WATER TEST KIT

Pesticide ingestion and inhalation can damage internal organs, cause cancer, and eventually death. The World Health Organization estimates that one-half of the ground and well water in the U.S. is contaminated with pesticides, resulting in 20,000 deaths per year. **PRO-LAB'S PROFESSIONAL PESTICIDES IN WATER TEST KIT** offers an instant, do-it-yourself test which monitors water for hazardous levels of pesticides. Testing for pesticides should be done annually.

LEAD TEST KIT FOR PAINT & DUST

Ingesting lead paint and breathing in lead dust are the #1 contributors to lead poisoning which causes brain damage and affects over 200,000 children each year. **PRO-LAB'S PROFESSIONAL LEAD TEST KIT FOR PAINT & DUST** offers the option of testing either suspect of lead paint or lead dust to EPA and HUD approved methods (meets EPA title X) for real estate transactions. Simple to use test utilizes atomic absorption spectrometer via graphite furnace and offers EPA proficiency results within 2 weeks. \$15.00 lab fee required. Express service is also available for an additional fee.

IF YOU CANNOT FIND THE TEST KIT YOU WANT, PLEASE SPEAK TO A STORE ASSOCIATE. SOME TEST KITS MAY NEED TO BE SPECIAL ORDERED.

PROTECT YOUR FAMILY!
Test Your Home For Environmental Hazards

"Home Safety Test Kits"

PRO-LAB™ We care about your safety!

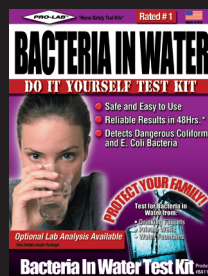

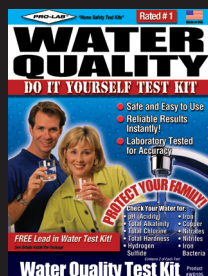

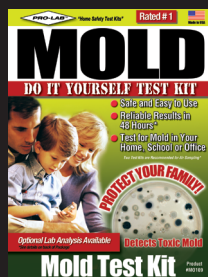

Every day more Americans are concerned about the mounting environmental health hazards faced by indoor pollution. This is primarily due to the overwhelming media attention and newly enacted legislation regarding these life-threatening pollutants. Some of the major causes of these pollutants is the construction of more tightly sealed buildings with reduced ventilation and the use of synthetic building materials and furnishings.

Today, one person in ten suffers from headaches or high blood pressure. Birth defects are on the rise. One out of every five people will get cancer during their lifetime, a 26 percent increase in the last two decades according to the National Cancer Society. In addition to cancer, environmental pollution is suspected to be a major cause of asthma, emphysema, nervous disorders, and there is speculation that it might also figure into puzzling diseases like Alzheimer's and Parkinson's.

For these reasons Professional Laboratories, Inc., developed the **PRO-LAB™** brand of home safety test kits. The **PRO-LAB™** brand test kits will help prevent health risks by identifying dangerous pollutants in the air, water, and surface areas in homes, schools, and offices. The **PRO-LAB™** brand test kits are renown for accuracy and reliability, and offer consumers tests that meet or even exceed state, federal and EPA guidelines. The **PRO-LAB™** brand test kits provide both qualitative and quantitative results: revealing the presence and exact count of pollutants. By informing concerned end-users of the true extent of their problems, Professional Laboratories reinforces their brand's recognition as the authority in the home safety testing industry.

Protection...Testing is Your First Line of Defense.

To find out if you have environmental pollutants in your home or office, you **must** test. The **PRO-LAB™** brand test kits contain all of the necessary information and materials needed to detect dangerous pollutants. All lab analyses are performed by EPA recognized laboratories in compliance with State and Federal lab methods. Professional Laboratories, Inc. is an environmentally conscious company that continues to educate and help protect people from environmental pollutants. Professional Laboratories, Inc. is not owned by or beholden to any company selling pollution abatement services or air or water treatment devices.

RADON GAS TEST KIT

Radon gas has been found in varying amounts in every state in the U.S. killing up to 30,000 people each year from lung cancer. Deadly radon gas seeps into homes through cracks in the foundation and walls, sump pumps and floor drains. **PRO-LAB'S PROFESSIONAL RADON GAS TEST KIT** offers you a professional radon analysis of your home or office utilizing patented liquid scintillation technology. Offers EPA proficiency results within one week. \$15.00 lab fee required. Express service is also available for an additional fee.

MOLD TEST KIT

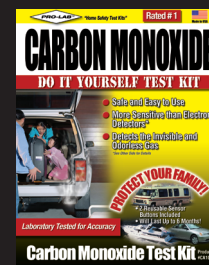

Medical studies have found that mold is the #1 causes of allergic symptoms. The black mold *Stachybotrys* found in home, office and school environments has been linked to fatal pulmonary disorders. **PRO-LAB'S PROFESSIONAL MOLD TEST KIT** offers a simple, do-it-yourself test which indicates the presence of molds in 48 hours. Optional lab analysis available which indicates the exact count and type of mold present. \$30.00 lab fee required. Express service is also available for an additional fee.

WATER QUALITY TEST KIT

Water contamination causes cancer, birth defects and Blue Baby Syndrome. **PRO-LAB'S PROFESSIONAL WATER QUALITY TEST KIT** offers 18 instant tests for over chlorination (causes cancer), nitrates/nitrites (cause Blue Baby Syndrome), hardness and alkalinity (clogs and damages pipes), iron (stains fixtures, laundry and even hair), copper, pH, iron bacteria and hydrogen sulfide. Contains individual laboratory grade test strips for accuracy and reliability.

BACTERIA IN WATER TEST KIT

Bacterial contamination causes severe digestive problems, fever, nausea, diarrhea and sometimes even death. According to the EPA, total coliform and *E. coli* bacteria testing is recommended twice a year. **PRO-LAB'S PROFESSIONAL BACTERIA IN WATER TEST KIT** offers a simple, do-it-yourself test which indicates the presence of bacteria in 48 hours. Optional lab analysis available which indicates the exact count and type of bacteria present. \$30.00 lab fee required. Express service is also available for an additional fee.

RADON IN WATER TEST KIT

Over 17,000 homeowners with private and municipal well water are affected by water borne radon according to the US EPA. Radon is the 2nd leading cause of lung cancer and is emitted in homes from well water during showering, cleaning, brushing your teeth, and doing laundry. **PRO-LAB'S PROFESSIONAL RADON IN WATER TEST KIT** is simple to use, and utilizes patented liquid scintillation technology that offers EPA proficiency results, within one week. \$15.00 lab fee required. Express service is also available for an additional fee.

CARBON MONOXIDE DETECTOR

Invisible and odorless carbon monoxide gas kills over 5,000 people each year. Clogged chimneys, malfunctioning stoves, water heaters, space heaters, as well as auto, boat and airplane exhausts release carbon monoxide into the air that you breathe. **PRO-LAB'S CARBON MONOXIDE DETECTOR** contains two (2) yellow chemical buttons that turn grey when in contact with carbon monoxide. They will detect as little as 50 ppm (before it becomes dangerous to you and your family.) The instant detector is reusable and each button will last up to three months, once opened.

LEAD SURFACE TEST KIT

Lead poisoning causes brain damage in children from birth to 8 years old. Test your home or office for this deadly toxin. **PRO-LAB'S PROFESSIONAL LEAD SURFACE TEST KIT** contains 6 instant test strips to insure you and your family's safety. Test dinnerware, mini blinds, ceramics, soil, plumbing pipes and fixtures, children's toys, antiques etc. Used by the EPA and HUD.

LEAD IN WATER TEST KIT

Lead contaminated water from lead pipes and fixtures contribute to lead poisoning in over 40,000,000 homes. Every time you drink from the faucet, cook with tap water, or brush your teeth, you may be at risk. **PRO-LAB'S PROFESSIONAL LEAD IN WATER TEST KIT** offers you an accurate water analysis to EPA proficiency standards. Fill the vial with water, send it to our certified laboratory and we will send you a professionally documented lab report revealing the amount of lead in your water to as little as 1 ppb. (EPA standard is 15 ppb). \$15.00 lab fee required. Express service is also available for an additional fee.
