- Unique 10° tilting feature for residual liquid extraction
- Highly polished bright zinc finish for corrosion resistance
- For 55 Gallon steel drums
- Material: Zinc plated steel
- Load Capacity: 1200 lb.
- Casters: Steel (4)

- Uniform Tilt Capacity 200 lbs.

Simply depress the foot operated locking tilt mechanism to tilt the drum by 10°. Includes four 3" Dia. x 1 1/4" W swivel casters and 48" nylon pull strap with a rubber-coated hanging hook. Welded steel construction with the zinc plated finish. Some assembly required.

Get this simple, easy tilting drum dolly that is used to tilt steel 55-gallon drums by 10° for residual liquid extraction. This drum dolly is constructed of welded steel with a highly polished bright zinc finish for corrosion resistance. This dolly includes (4) 3-inch diameter x 1 1/4 inch wide steel swivel casters and 48-inch nylon pull strap with a rubber coated hanging hook. The nylon pull strap helps in transporting your drum down aisles or over thresh holds.
