

The reviews are in from our U.S. soldiers wearing HearPlugz-DF™. Overall response is: "Excellent!"

"The guys and gals love them! I have provided them to those that are on convoys on a regular basis. Normal earplugs attenuate too much and you can't hear any communication. With HearPlugz, you can hear everything and know that if we get hit by an IED, our hearing will be intact. This is critical – instead of having a temporary hearing loss after an explosion, we have our hearing intact, allowing us to use our radios to call for help." – D.S., Safety Manager, Army Corps of Engineers

NEW HearPlugz-DF™ dual-filtered hearing protectors feature VARIABLE ATTENUATION. As noise levels go up, noise suppression goes up, allowing speech and radio communications to be heard!

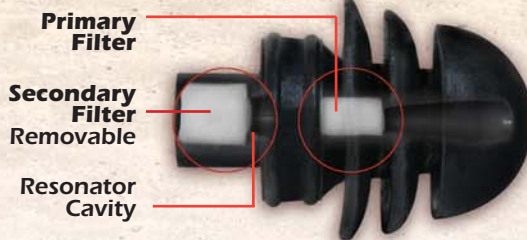

HEARPLUGZ-DF™

DUAL FILTER by E.A.R., Inc.

- Advanced filter technology improves speech and radio communication without distortion or muffling
- Use with one or two filters
- External filter is removable
- Fit comfortably under helmets
- Floatable, moisture resistant
