15. Understanding Error Messages

A used test strip was inserted.
Repeat the test with a new test strip.

The blood or control solution sample was applied before the ▲ symbol appeared.
Repeat the test with a new test strip and wait until the ▲ symbol appears before applying the blood or control solution sample.

The temperature during the test was out of the operating range.
Move to an area where the temperature is within the operating range (5-50°C/41-122°F) and repeat the test after the meter and test strips have reached a temperature within the operating range.

The blood sample has abnormally high viscosity or insufficient volume.
Repeat the test after inserting a new test strip.

This error message may appear when the wrong blood glucose test strip is used instead of Petigree blood glucose test strip.
Repeat the test with a Petigree test strip.

There is a problem with the meter.
Do not use the meter. Contact technical support at 1-770-847-8377.

16. Important Information

Intended Use:

The product is *in-vitro* diagnostic medical device (IVD). The intended use of the product is for monitoring blood glucose in a dog or cat with diabetes, using capillary whole blood, venous blood sample and test strip reagent technology.

- The Petigree Blood Glucose Monitoring System is intended for use in monitoring glucose samples taken from the dog or cat.
- **The Petigree Blood Glucose Monitoring System is not for human use.**
- The Petigree Blood Glucose Meter should be used only with the Petigree Test Strips.
- Apply fresh whole capillary blood to the test strip. Fresh venous blood may also be used only if drawn by veterinary professional.
- Fresh venous blood specimens containing the anticoagulants EDTA and Heparin is acceptable. Iodoacetate or fluoride/ oxalate are not recommended.

17. Caring for the System

Use a soft cloth or tissue to wipe the meter exterior. If necessary, dip the soft cloth or tissue in a small amount of alcohol.

Do not use organic solvents such as benzene, acetone, or any household and industrial cleaners that may cause irreparable damage to the meter.

- Do not expose the meter to direct sunlight or heat for an extended period of time.
- Do not let dirt, dust, blood, or water into the meter's test strip port.
- Do not drop the meter or submit it to strong shocks.
- Do not try to fix or alter the meter in any way.
- Strong electromagnetic radiation may interfere with the proper operation of this device. Keep the device away from sources of strong electromagnetic radiation, especially when measuring blood glucose of dogs or cats.
- Keep the meter in a cool and well ventilated place.
- Store all the meter components in the portable case to prevent loss and help keep the meter clean.

The information in this manual is correct at the time of printing. However, Petigree reserves the right to make any necessary changes at any time without notice as our policy is one of continuous improvement.

Product specifications

Measurement range	10 ~ 600 mg/dL (0.6 ~ 33.3 mmol/L)
Sample size	Minimum 0.4 µL
Test time	5 seconds
Sample type	Fresh capillary whole blood, Fresh venous blood
Calibration	Plasma-equivalent
Assay method	Electrochemical
Battery life	Approximately 3,000 tests
Power	Two 3.0V lithium batteries (disposable, type CR2032)
Memory	500 test results
Size	92 X 52 X 21 (mm)
Weight	55 g (with batteries)

Operating ranges

Temperature	5-50°C (41-122°F)
Relative humidity	10-90%
Hematocrit	20-60%
