

Product Description

The **Aeon Series** is a fixed frame projection screen that uses Elite's EDGE FREE® technology. EDGE FREE® means that there is no external framework (edge) bordering the material as seen in traditional frame-screens. The design utilizes an internal frame with wrap-around material that resembles a giant size flat panel display. The Aeon includes a black velvet trim edge strip as an option to further enhance the overall appearance.

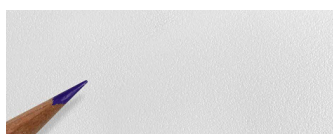

Product Design & Features

- Stretches over frame for a permanently tight-tensioned flat surface
- Aluminum lightweight split-frame design
- Easy to assemble and install in minutes
- EDGE FREE® or install ultra-thin trim
- Smaller footprint maximizes viewing area
- Wall mount brackets slide ensuring the frame is properly centered
- Optional LED backlight kit with remote control – **sold separately**
