

Kestrel Tab-Tension 3 CineGrey 4D

ALR Floor-Rising Electric Projection Screen

Compatible with Standard “Long” Throw Projectors ONLY

Product Description

The **Kestrel Tab-Tension 3 CineGrey 4D** is a floor-rising electric front projection screen with ambient light rejecting technology. The CineGrey 4D is an angular reflective material that incorporates a high-contrast diffusion layer to provide contrast-rich images in ambient light room environments to combat the washout effect typically experienced with matte white materials.

The projection screen surface ascends and descends into its housing for a non-invasive solution where permanent installations are not practical.
