Included Top Qualifier 2.4GHz Radio System!

This model is equipped with the new TQ 2.4GHz radio system. The TQ's modern design features an internal antenna for a sleek look, and an ergonomic grip for all-day driving comfort. 2.4GHz technology means there's no need to worry about frequency conflicts, no matter how many other drivers you're racing with. Just switch on and drive—the TQ automatically locates and locks onto an open frequency.

Features:

- 2.4GHz Technology—just switch on and drive
- Fully installed and Ready-To-Race®
- 3-channel 2.4GHz receiver with dual Channel-1 inputs
- Lightweight with just 4 AA batteries

MODEL 5907

Previous experience with radio controlled models is mandatory. This model is capable of very high speeds and requires an even higher level of skilled driving control. Model requires detailed setup, and/or maintenance procedures with required support equipment.

WHAT'S IN THE BOX:

Fully Assembled Slayer Pro 4X4, Ready-To-Drive® with TRX 3.3 Racing Engine, TQ™ 2.4GHz radio system, and EZ-Start Electric Starting.

Over \$50 of Premium Running Accessories Included!

Slayer Pro 4X4 sets the benchmark for value by including all the quality Traxxas running accessories you need such as a rechargeable EZ-Start battery, charger, premium fuel dispensing bottle, extra glow plug, extra air filter, a high-quality specialty tool set, and an owner's manual. Complete, easy, and fun. It's what you expect from the company that created the world's first Ready-To-Runs over 27 years ago.

WHAT YOU'LL NEED TO RUN YOUR SLAYER PRO 4X4:

Sold separately at your hobby dealer.

Traxxas Top Fuel® Power Plus™
Fuel Filler Bottle Included!

8 AA Alkaline Batteries

IMPORTANT! THIS PRODUCT IS NOT DESIGNED FOR CHILDREN OR MINORS YOUNGER THAN 16 YEARS OLD. RESPONSIBLE ADULT SUPERVISION IS REQUIRED DURING OPERATION AND MAINTENANCE.

Slayer Pro 4X4 is a high-performance model which is NOT intended for use on public roads or in congested areas where its operation may conflict with or disrupt pedestrian or vehicular traffic. Read all enclosed information before operating. Fully illustrated, step-by-step instructions describe adjustment, operation, and required maintenance procedures. Slayer Pro 4X4 should not be operated in a crowd, indoors or without adequate space.

The vehicle is fully assembled, ready to run, and requires the following items for operation: 8 AA alkaline batteries and model car fuel. These are available from your hobby dealer. In an effort to continually upgrade our products, Traxxas reserves the right to make improvements and modifications to this model, which may not be reflected in the photographs and specifications printed on this box. Battery and charger style subject to change and may vary from photos.

This product is protected by one or more of the following: US patent Nos. 7,581,624; 7,377,295; 7,383,824; 7,534,170; 7,559,822; 7,617,903; 7,621,545; 7,717,221; D567,886

SLAYER 50+^{mph} EXTREME POWER

PRO 4X4

Nitro-Powered Short Course Race Truck

4WD Short Course Racing brings together the most horsepower and the most suspension travel for incredible side-by-side, fender-banging racing action. Engines scream at the redline as dirt and rocks roost from all four tires. Only the fastest, most powerful trucks dare to compete! The Traxxas Slayer Pro 4X4 brings the sound, smell, and excitement of Pro 4X4 short-course racing right into your own backyard. Extreme TRX[®] 3.3 power punches hard and assaults the ground as all four tires claw for traction. The amazing Revo[®]-Spec linkage-based suspension delivers seemingly bottomless suspension travel that simulates the handling and jumping ability of the full-size Pro 4X4 trucks. The new long wheelbase chassis and wide-track stance deliver superior stability in rough conditions. Slayer Pro 4X4 brings together scale looks and 50+mph performance for all-day fun, excitement, and competition.

EZ-Start Electric Starting

Large Cooling Head

Large Two-Stage Air Filter

Two-Speed Fwd Only Transmission

Blue-Anodized Long Wheelbase Aluminum Chassis

Hard-Anodized Aluminum GTR Shocks

Scale Tube-Style Bumpers

Silicone Exhaust Deflector

Resonator Tuned Pipe

Extra Fuel Tubing

Compact Receiver and Battery Box

Semi-Metallic Brake Pads

High-Torque Waterproof Digital Steering Servo

Wide-Track Suspension Arms

TRAXXAS
The Fastest Name In Radio Control

Extended Chassis and Wide-Track Suspension

The Slayer Pro 4X4 uses the Revo 3.3 extended chassis and new suspension arms for a 30mm increase in wheelbase and a 26mm increase in track width.

In addition to a longer wheelbase, Slayer Pro 4X4 is also a full 26mm wider thanks to its new wide-track suspension arms. The wider arms give slayer a larger footprint for greater traction, more cornering bite, and aggressive handling.

TRX 3.3 RACING ENGINE

The award-winning TRX 3.3 Racing Engine is famous for its broad, linear output that makes Extreme Horsepower available practically anywhere in the rpm range. Hammer the throttle at any speed and Slayer Pro 4X4 completely shreds the ground underneath. Brutal bottom-end torque punches hard out of the turns and then screams to top speeds soaring past 50mph! The extra-large dual-stage Traxxas air filter allows increased air flow to the TRX 3.3 Racing Engine, breathing in even more horsepower and torque.

High-Torque Waterproof Steering and Throttle Servos

A race truck needs powerful servos for responsive performance, and Traxxas delivers with high-torque waterproof units. The 2056 throttle servo provides 80 oz-in of muscle, and the digital 2075 steering servo swings the tires with 125 oz-in of precision power. That's three times the power of typical "standard" servos.

Hard-Anodized, PTFE-Coated GTR Shocks

Ultra-long lasting hard-anodized, PTFE-coated aluminum GTR shocks represent the pinnacle of off-road performance, offering silky smooth damping and a serious factory-works look. Thanks to the extra tough hard-anodized finish, shock performance stays true and consistent for less maintenance and better handling, run after run.

EZ-Start Electric Starting with Battery and Charger

The Traxxas EZ-Start lights your glow plug and starts your engine quickly and smoothly at the push of a button. Traxxas' exclusive Smart Start[®] technology monitors critical starting functions, automatically sensing and diagnosing potential problems for trouble free engine starting every time!

Powerful Semi-Metallic Brake Pads

Traxxas' unique semi-metallic brake pads allow class-leading 4-wheel braking performance that's always smooth and consistent.

Resonator Tuned Pipe

The dual chamber Resonator[™] aluminum pipe delivers the most linear power band from the TRX[®] 3.3 Racing Engine. It's dyno-tuned for torque down low and big horsepower on the top end. The extra-fine mirror-polish finish looks great and stays clean longer.

Torque-Control Slipper Clutch

Fan-cooled alloy plates with semi-metallic friction pads deliver unequalled precision, consistency, and power handling.

SLAYER PRO 4X4

Mike Jenkins

MIKE JENKINS EDITION

As the owner of Traxxas, The Fastest Name In Radio Control,[®] Mike has spent a lifetime around radio-controlled racing cars and trucks, and fulfilled his passion for full-size motorsports with forays into motocross, drag racing, and later, road racing with Corvettes, Miatas and other sports cars. In 2007, Mike and brother Mark began racing the SCCA's Mazda MX-5 Cup series, which features specially prepared open-roof sportscars with strict "spec" rules that keep the cars very closely matched. In this highly competitive form of sportscar racing, meticulous preparation and precise, consistent driving are critical to success, and are skills that translate to all racing disciplines—including off-road racing. After a trip to Primm, Nevada for an up-close look at short-course off-road racing, Mike recognized the high-intensity motorsport as the perfect fit for Traxxas, the number-one name in hobby-class radio-controlled cars and trucks. The over-the-top horsepower, incredible air time and go-for-it driving

style of short-course racing was like R/C off-roading gone "full size." Traxxas quickly signed on to sponsor Pro Light champ Jeff Kincaid, and Mike and Mark formed Jenkins Brothers Racing to field a two-truck Traxxas team of their own, with Mark driving a Pro 2WD truck and Mike climbing into a Pro 4X4 machine. Despite racing against a field of drivers with far more off-road experience, Mike finished his rookie season with ten top-10 finishes, one top-five, and two third-place podium spots in seventeen starts to become the 2008 Pro-4 Rookie of the Year. In 2009, Traxxas signed on as the title sponsor of TORC, THE Traxxas Off-Road Championship. Mike finished the inaugural Traxxas TORC series season with five top-5 finishes and two visits to the podium. He finished third at the historic Crandon International Raceway, and capped the season with his first TORC-series win in the final round of TORC racing at Las Vegas Motor Speedway.
