Supersedes

0909

The CPJ, CPH and EK models feature the famous Flint and Walling "Service Plus" motor, available in either NEMA J or Uni-frame flange construction. The F & W 56 frame, double ball bearing motor offers the ultimate in performance and dependability.

Designed for years of trouble-free operation and simple, on-site servicing, the CPJ and CPH feature unique interchangeability of replacement parts to keep inventories at a minimum.

The FJ Pump is designed for shallow wells with suction lifts from 0 - 25 ft. Featuring cast iron construction, the pump incorporates an integral shallow well ejector for ready use installation. The TEFC, permanent split capacitor motor is dual voltage (115/230V) with easy change voltage switch. This pump is quick to prime and features a NEMA Class C cover to protect the capacitor from moisture. The proven hydraulic pump design meets essential household water pressure demands.

CPJ ,CPH, EK AND FJ SERIES

Whether operating as a shallow well or deep well pump, count on F & W's versatile, powerful jet pumps to deliver more water at full city pressures.

These pumps provide higher single stage capacities and pressures; depths to 150 feet, capacities to 1800 GPH and as much as 90 pound pressure.

Service Plus F&W Motors

Service Plus JET PUMP MOTORS

“Service Plus” means top reliability plus quick access to all electrical components.

Routine maintenance is simplified through the convenient mounting of electrical components. Removal of the rear access cover exposes components for fast replacement. Spade connectors enable quick hookup and voltage change.

Rear access cover directs ventilating air over the windings and bearings, and away from the switch mechanism. All electrical components are protected from dirt, dust and insects.

Quality-wound double insulated stator uses nylon overcoated wire with an additional varnish dip to insure against moisture penetration. Class B wire insulation rated for 266°F.

Permanently lubricated ball bearings are located on each end of the motor insuring alignment of the dynamically balanced rotor for smooth operation and extended motor life.

Fully enclosed transfer switch mounted on a UL recognized thermo-set plastic board utilizes spark quenching and extra large silver cadmium oxide contact points.

Patented governor features an advanced simplified design, using a stainless steel compression spring to insure proper motor RPM before switching from start to run windings.

Zinc clad steel shell and cooling fan resist corrosion and dissipate motor heat.

Automatic overload senses both start and run winding heat to ensure complete winding protection.

“Service Plus” motors are manufactured by Flint & Walling, Inc. in Kendallville, IN, USA—An industry exclusive among jet pump manufacturers.

EK, CPJ, CPH PRODUCT FEATURES

High tensile gray iron pump bodies with large water cavities for fast, easy priming. Separate priming ports enable quick water fill and the fast evacuation of air. Separate 1/4" tappings are provided for the convenient mounting of pressure/vacuum gauges and the pressure switch, and for pump draining.

Buna-n quadraseal is reusable and provides a positive seal between the pump case and motor bracket.

Molded diffusers are corrosion and abrasion resistant, and provide precision alignment with the impeller for maximum performance. The snap-in diffuser design uses no bolts and is held in place by compression.

Molded thermoplastic impellers on 1/3 thru 1 HP CPJ, CPH, and EK models. Precision balanced, these impellers are ultra-smooth for high efficiency. 1-1/2 HP CPJ models feature brass impellers.

All pipe plugs and priming plugs are coated with a non-hardening, non-toxic, non-corrosive material which allows for easy removal even after the pump has been in service for years.

Standard shaft seal with ceramic and silicon carbide face is self-adjusting throughout the seal life. One size fits all models.

Patented uni-frame motor bracket used on CPH and EK models is unique to the water systems industry and is designed to accept any NEMA J motor if motor replacement is ever necessary.

Automatic overload senses both start and run winding heat to ensure complete winding protection.

CPJ models feature NEMA J motors. All motors are dual voltage, capacitor start with automatic thermal overload protection.

1/3 and 1/2 HP CPJ SERIES

CPJS SHALLOW WELL

Includes: Pump, Motor, Pressure Switch and Shallow Well Ejector.

CPJ CONVERTIBLE

Includes: Pump, Motor, Pressure Switch and Flow Control Screw. Order Ejector and Pressure Gauge Separately.

FLINT & WALLING

Zoeller Family of Water Solutions™

CPJ and CPH Series Jet Pumps

3/4, 1 and 1-1/2 HP CPJ SERIES

CPJS SHALLOW WELL

Includes: pump, motor, pressure switch and shallow well ejector.

CPJ CONVERTIBLE

Includes: pump, motor, pressure switch and pressure regulator. Order ejector and pressure gauge separately.

1/2, 3/4 and 1 HP CPH SERIES

CPH05S 1/2 HP SHALLOW WELL

Includes: pump, motor, pressure switch and shallow well ejector.

CPH CONVERTIBLE

Available in 1/2, 3/4 and 1 hp. Includes: pump, motor and pressure switch. Order ejector, control package and pressure gauge separately.

134349 Control Package

Order Separately for Deep Well Applications.

EK and FJ Series Jet Pumps

POWER CONVERSION UNIT FOR JET AND CENTRIFUGAL PUMPS

Order No.	Application
122649 NEMA C	Can be used with any jet or centrifugal pump equipped with NEMA C or NEMA J standard electric motors. Gasoline engine or electric motor can be directly coupled with shaft or can be used with belt and pulley. For electric motor used with belt drive, the motor HP should be doubled. The gasoline engine HP should be doubled that of standard motor in either case above.
135458 NEMA J	5/8" Dia. steel shaft, mounted in two heavy duty ball bearings, carry all radial and thrust loads.

CONVERTIBLE JET PUMPS WITH POWER CONVERSION UNIT

Model No.	Description	Pressure Control Valve Required†
CPJ05 222	Threaded Shaft	124330
CPJ07 222	Threaded Shaft	132446
CPJ10 222	Threaded Shaft	132446
CPJ15 222	Threaded Shaft	133383

†Pressure control valve required for deep well applications - order separately. Order ejector separately.

CPJ Convertible Jet Pumps fitted with a power conversion unit offer the flexibility of electric motor or gasoline engine drive. Can be belt or direct driven. Power conversion unit features cast iron body and double, heavy duty ball bearings.
