

# HYDROTRONIC

LEADER  
PUMPS

## GENERAL DATA

### Applications

Electronic control system for surface and submersible pumps. Designed to allow the automatic operation of the pump and prevent it from dry-running.

### Technical data

- Suitable for pumps with power up to 1500 W, flow rate up to 32 Gpm, operating pressure more than 26 Psi and maximum pressure range between 51 psi and 116 psi
- Manual and automatic reset
- Built-in non return valve
- Easy to install as it is supplied with power cable with plug and cable with socket for the connection to the pump
