## HOW TO USE THESE CHARTS

## LESSON PLANNING

Each bar on the charts represents a time frame in which the topic is introduced, practiced and mastered.

## Example:

Grade Level

| $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ |
| :---: | :---: | :---: | :---: |
| Introduce | Practice | Master |  |

These charts will provide you with a frame work for using MathMedia Arithmetic Software to achieve math curriculum standards.

Please note that topics can be introduced, practiced and mastered concurrently.

## STUDENT PLACEMENT

Use the Level Review sections to place new students at their appropriate level. After taking the Level Review, scores are reported to the LMS (Learning Management System). Based on the score, you may decide to advance the student to the next topics or remediate the student to the previous topics.
