

## Beam Seating Assembly Instructions

Helpful tip: Insert screws and turn a few revolutions only at each step. Do not fully tighten until all screws for each step are inserted. Tightening too soon can cause unevenness.

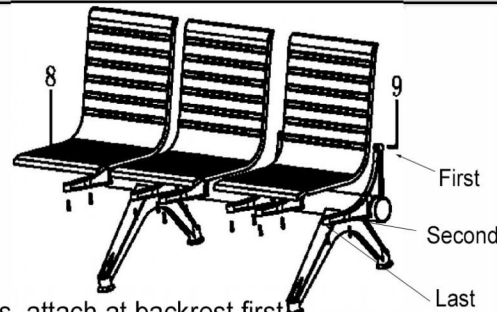

**1** Insert leveling glides into feet. Then attach legs to the beam.

**2** Attach Seat Brackets to Beam.

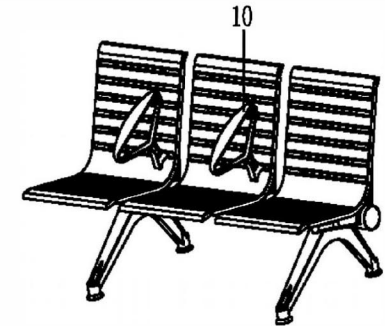

**3**

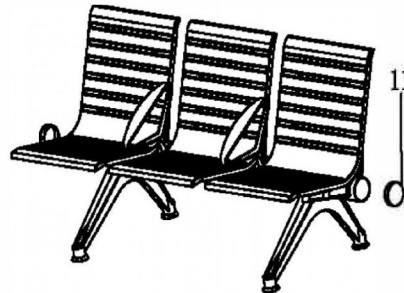

To attach seats, attach at backrest first, then middle of seat, then the front of the seat with the screws provided

**4**

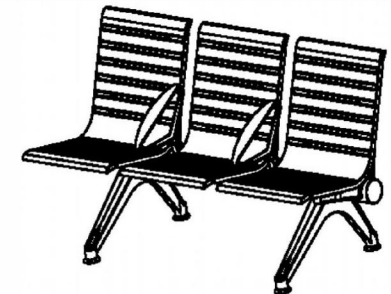

Next, attach the armrests in between the seats.

**5**

Add the caps on the beam and feet.

**6**

Adjust leveling glides as needed.

NO	Pic	Des	Size (MM)	Qty
1		Beam	95*1710	1
2		Leg	606*88*300	2
3		Screw	M12*30	4
