F E A T U R E S

9MM PET material in Cool Grey

Cable raceways

Combo clear/frosted glass

1-1/4" Design

Tall enough to provide full privacy yet do not interfere with HVAC and office lighting

PET material absorbs sound to reduce noise in work areas. Glass windows allow light to filter into the work area.

Simple connection system. No specialized installers needed.

INTEGRATED CABLE MANAGEMENT

Built-in cable troughs keep power and data cables organized, concealed and out of the way for a clean, professional workspace.

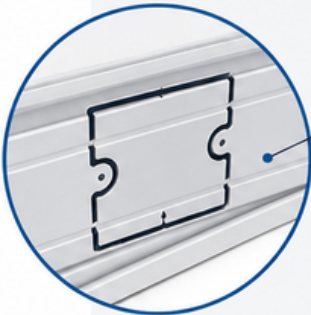

NEAT & ORGANIZED
Route power and data cables neatly through the trough to eliminate clutter and tangles.

PROTECT & PRESERVE
Cables are protected from damage and wear, extending their lifespan.

FLEXIBLE DESIGN
Punchouts can be removed as needed to create access points for power and data where you need them.

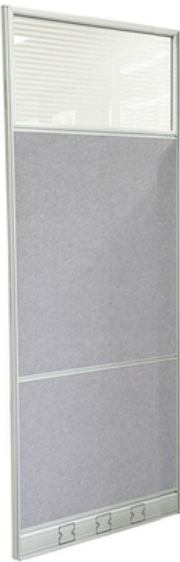

REMOVABLE PUNCHOUTS
Punchouts can be removed if desired to accommodate your specific cable routing needs.

Flip-down metal cover provides easy access to cables while keeping them hidden from view.

Cable troughs conceal cords within each panel for a clean, organized and professional look.

7'H PET Sound-Absorbing Office Panel Series

Full Specifications:

- Raceway at base of office panel allows cords and cables to route through hollow channel and even through connection posts for complete cable connectivity
- Compares to a Noise Reduction Coefficient of .75-.90 dependent upon frequency.
- PET (polyethylene terephthalate) is a sustainable material made from recycled plastics that keeps waste from landfills and oceans. Can be efficiently recycled at the end of life cycle into new products.
- Environmentally friendly: No formaldehyde or VOC emissions, making it safe and suitable for indoor environments.
- PET is a tackable material, offering a convenient way to mount notes in cubicle settings.
- Punch-outs in raceway panels for electrical/data outlets (Electrical not included. Must be supplied and installed by electrician).
- Flame retardancy: National B1-level fire-resistance.
- Lightweight yet durable aluminum frame. The panel core consists of rigid engineered wood surrounded by two 9mm layers of PET.
- Accepts outlet plates with standard 2-3/8" hole spacing. Plates with different spacing may require drilling of one screw into aluminum. Panels are non-powered.
- Superior metal frame construction creates a solid and stable office panel system. Strong enough to support work surfaces in metal frame channels.
- Flip down metal raceway covers conceal cable troughs measuring 7/8"D x 3-3/4"H. Panel end and connector post raceway openings are 3/4"D x 2-3/4"H.
- Includes a simple in-line connection system requiring no additional hardware. Easy set-up requires no special training or instruction.
- Adjustable leveling glides.
- Each panel includes a side edge finishing strip for a neat and finished appearance at the end of panel run.

Installation Guide
