You may NEVER ha

WHETHER FOR WORK OR RECREATION, Infratech Comfort He outdoor areas into comfortable inviting spaces. A low cost, energy

- Restaurant/home patios
- Factory areas and garages
- · Pools and spas, gazebos
- Spot heating for work stations

MAKES OUTDOOR LIVING EASY ... EVERY DAY OF THE YEAR!

Extend your backyard fun with Infratech's W-Series Infrared Comfort Heaters

Hotel and restaurant patio dining

ve to move inside again!

aters turn cold indoor and efficient solution ideal for:

- Outdoor smoking areas
- Valet parking

The W-Series Heater incorporates a specially designed electric quartz heating element that produces safe infrared radiant energy. Radiant energy is only absorbed by solid objects and is not wasted heating the air. In addition, Infratech heaters emit no harmful ultraviolet rays.

Since there are no open flames or carbon monoxide emissions, mounting clearance requirements are minimal. W-Series fixtures can be installed at lower mounting heights, under canvas, wood awnings, eaves and in interior locations. Adjustable swivel mounts allow for ceiling or wall installation. Short standoffs allow the fixtures to seamlessly blend in with any restaurant or patio décor.

Solid state and analog controls are available for intensity adjustment including multiple zones, timers and home system integration.

Low mounting heights and under canvas

- Suitable for Indoors or Outdoors -Ceiling, Wall, or Flush Mount
- · Mounting brackets included
- · Low cost of ownership
- · Minimal clearance requirements
- · Quartz elements rated for 5,000 hours
- · No moving parts low maintenance
- · Easily regulated heat output
- No tanks to fill
- · One-year warranty
- · UL Listed

NFRATECH'S parabolic reflector is made of a special corrosive resistant alloy, an important feature for humid climates or coastal areas.

colic FOR COMMERCIAL OR RESIDENTIAL ENVIRONMENT

W20 T-Bar Flush Mount Frame (Available in White and Stainless Steel)

INSTALLATION OPTIONS

SAMPLE INSTALLATION USING SOLID STATE CONTROL OPTIONS FOR MULTIPLE W-SERIES HEATERS

GLOSSARY

Choosing Your W-Series Heaters:

W-Series Single Element Heater

WD-Series Dual Element Heaters

NOTE: Indoor or well-protected environments will generally exceed average. Heaters can provide less than average coverage in extremely cold/windy conditions.

STEP #1 -

Determine the approximate measurements and mounting heights of the area you want coverage.

STEP #2 -

Choose the size heater(s) that will work both functionally and aesthetically (coverage area, length of heater, color of heater, ceiling, wall, or flush mount) for your installation.

STEP #3 -

Review installation table and choose (to fit your budget) between value control options or infinite adjustment with solid state controls. (Professional installation is suggested)

STEP #4 -

Turn on and enjoy the outdoors in comfort!

Sample Control Options

Simple, Low Cost Input Regulators (Maximum 15 AMPS)

One Zone Remote Analog Control

Two Zone Remote Analog Control with 60 Min. Timer Option

Main Zone Control Panel

Comfort Heat Controls for W-Series Comfort Heaters

In-Wall Control Assemblies for Indoor or Protected Outdoor Areas

Part # 14-4100 (120V) - Part # 14-4200 (240V) Single SS Wall Plate w/Deep Gang Box (Includes INF Input Regulator)
