## Project Information:

Height:  2'  3'  4'  5'  6'

Number of Gates: \_\_\_\_\_

Permanent Posts:  Y  N  
(See Below)

**Please include a simple sketch below.** The interlocking iron fence stakes itself so permanent square steel posts are not used in all applications, however many customers do use them at the gateways, corners and at the ends of the runs. With 5' tall and 6' tall fence we use more square posts throughout the run for extra stability. Be sure to include the length of each side and location of gateways. Also indicate if there is a noticeable slope to your property.
