

MODEL NO. 09.AB72 & 09.AB73

Rechargeable Lights with Power Failure Feature and Low Voltage Cut-Off
INSTRUCTIONS

Place light in Charger so the pins of the light will match up with the pins on the charger. When the green LED light is glowing, the battery is fully charged. If the red LED light is glowing, the battery is not charged. (Red and Green LED lights are located on the left side of light handle.)

Your New SHO-ME rechargeable light is protected by a charging regulator, therefore it can not be overcharged. When not in use, leave light in the charger so it will always be charged.

Your SHO-ME rechargeable light can only be mounted and charged in the upright position. Battery can be recharged 100-500 times, depending on the depth of discharge. The battery is sealed lead-acid and requires no water.

Your SHO-ME rechargeable light is also equipped with a POWER FAILURE feature and low voltage cut-off. When light is placed in charger, turn light to ON position. (Light will not come on.) If household power fails, this light automatically comes on. When power is restored, light will go off and automatically recharge.

When power is off & the battery discharges to 4.5 volts (approx. 2.5-3 hrs.) the low voltage cut-off will shut the light off to save the battery from a total discharge.

LIMITED WARRANTY

Able 2 Products Company warrants each new product (except bulbs, strobe tubes, strobe power supplies and LED Products) to be free from defects in material and workmanship for a period of two years from the date of purchase.
