Our comprehensive [PC to TV](#) products include our **original S-Video Cables** and our exclusive [S-Video to Composite Video](#) (aka S-Video to RCA) adapters that provide you with excellent video quality on a regular television - **better** than using regular RCA-type phono plugs. See the links above and the "products" button on the left for our other products.

Featured above are some of our exclusive adapters, including our [PRO S-Video+Audio](#) adapter for connecting the **S-VIDEO + AUDIO** from your computer to a regular TV and our [Pro DVD to TV](#) cables to connect a stand-alone DVD player to your TV. You will notice a **significant improvement** in quality using the S-Video out of your DVD instead of the regular RCA video connections; this cable allows you to use the S-Video and audio from your DVD and connect to the yellow, red, and white jacks of your non-svideo TV.

Our convertors provide a better picture than regular video cables. The unique technology on our [S-Video + Audio](#) adapters allow you to send the **S-video and audio** from your computer's DVD (or other svideo devices) to your regular TV. If you just need to send the video only, then consider our [S-Video to RCA](#) adapters.
