"Composite RCA to S-Video" and "S-Video TO Composite RCA" adapters. Our adapters have a special video circuit that allow you to **keep the color signal**.

Our adapters are **TV, PC and MAC compatible** and are recommended by companies such as Leadtek, IBM and Apple.

With our "S-Video to RCA" adapter you may also be able to **improve the image quality** from your DVD player by using the "S-Video-out" of the DVD

player instead of the RCA yellow video-out. Plus, with our adapter you will be able to use the "S-Video-out" and the "composite" video out of your DVD **at the same time** to go to two different TVs. You'll need an extra cable to use the composite out, see our specialty "patch cables".

Today we're featuring the "S-Video to 3 RCA" adapter that is compatible with **NTSC & PAL** video formats and it's cross-platform, PC & Mac.

We're the **exclusive worldwide manufacturer** of these adapters and only sell **direct to you**.

FREE First Class Shipping World-Wide Click on "Shipping Options" for details and for other methods, including international shipping and APO/FPO.

We have thousands of SATISFIED customers all over the world for all our products.

Pictured here is our **exclusive** "S-Video & Stereo Audio Plug to 3 RCA adapter (**"S-video to 3 RCA"**) available in 1, 6, 12 and 24 ft. This adapter provides you with a **"straight-shot solution"** - no additional cables to connect, reducing signal degradation.

Reasons why our customers buy from us:

- *"The reason I selected your product is it is one-piece - **no loss of signal from couplings.**"*

- *"It's less than half the price of getting separate components."*

- *"It's an innovative product...with other adapters I would have had to buy three or four seperate adapters."*

- *"What better company to buy from than a company that **specializes** in the one product you are looking for and offer quick (and secure) order processing."*

Our **gold plated** connectors on the "S-Video to RCA" adapters provide you with optimum signal transfer and corrosion resistance. We only use UL approved **75 ohm impedance** cable.

Click on "S-Video to RCA" below to order.

Click on "RCA to S-Video" if you want to connect your composite video source (such as a VCR) to your A/V receiver or S-Video TV.

We **manufacture** and specialize in "**S-VIDEO-to-RCA**" adapters. We sell direct to provide you the best possible price - no middlemen involved.

We are also **Experts** on the **FlexCam Video Cameras** - click on "VideoLabs" for details.

Click on any of the buttons on the left (**or the names below**) to see more of our products.
