

PK-OVB4 CATCHER

INSTALLATION DIRECTIONS

This catcher comes with a bracket that has to be bolted to the mower deck for installation. Leave the bracket on the catcher and hold the entire assembly against the deck where it would belong. (Use 2 people for tighter fit and better installation). It should align itself where it has to go. The Bracket will rest on the deck directly above the discharge opening. Hold everything tight against the deck where you want it and then mark the holes. Drill the deck holes and bolt the bracket on to the deck. Simply insert the catcher mounting pins into the bracket. Your installation is now complete. If you need further assistance please call 570 226-6093 Monday-Friday.
