# Ethernet and PDH Service over SHDSL and SHDSL.bis line

Applicaon ti

Extend Ethernet, Datacom and PDH services over SHDSL and SHDSL.bis to areas beyond your Metro fiber network.

G.SHDSL modems, multiservice access nodes and Point to Point aggregation solutions enable service providers to quickly and economically extend Ethernet, datacom and PDH services over SHDSL and SHDSL bis connections. Connecting up to 15 remote locations, these devices provide a complete, end -to-end Ethernet, Datacom and PDH solution over diverse access lines for across packet switched networks and SDH networks.
