

Branda Performance / Legendary Fiberglass Products

Branda Performance / Legendary Fiberglass reproduction products are manufactured to look as original as possible with strict attention to detail and fit.

As with any fiberglass product, test fit parts prior to starting finishing work.

FIBERGLASS PARTS CANNOT BE RETURNED ONCE FINISHING WORK HAS BEEN STARTED!!!

Fiberglass Finishing Procedures:

Make sure part is free of oil/grease/etc. Sand part with scotch pads to rough up surface. Spray 3 coats of high quality epoxy primer. Sand with 180 grit sand paper again to rough up surface. Apply 3 coats of polyester based high build filler (such as Sikkens Brand Polysurfacer). Sand out starting at 120, next 180, and finish with 220 grit sandpaper.

Apply top coat of high quality primer, wet sand with 400, then 600 grit sandpaper. The part is now ready for painting.

Try to stick with one manufacture/brand of materials and follow their procedures and/or consult with your local automotive paint supplier.
