

## **KS-4000Pro professional speaker parameters description**

KS-4000Pro is a polygon trapezoidal built-in secondary frequency speaker, designed for a variety of mobile language and music expansion application places, can also be applied in various installation fixed occasions, can do ground expansion also can do ground return, combined with a built-in passive frequency divider, provide 6 M8 suspension points, the box consists of 18MM splint, surface of wear-resistant grain paint, widely used in KTV, bar, conference, multi-function hall,

- Technical Parameters

Components	LF1*12(312mm)
	HF1*1(44mm)
Connectors	2*NEUTRIK NL4
Frequency Response	40Hz-19KHz+3dB
Sensitivity(1W/1M)	99dB
Maximum Sound pressure	125dB
Rated Power	500W
Maximum power	2000W
HF Dispersion	80*50
Nominal Impedance	4~8ohm
Dimensions(H*W*D)	595*365*395(mm)
