

the FOLDAMOUNT 46

SIDE-FOLDING WALLMOUNT STRUCTURE

• Add First Team's optional backboard height adjuster for little leagues and youth camps

The FoldaMount46 side-folding wall mount structure simplifies the task of ordering and installing top quality side-fold wall-mounted basketball systems.

When your facility requires that the basketball goals be folded against the wall to make room for volleyball or other activities, call on First Team's FoldaMount46 series. The unit swings left or right for storage close to the wall without tools or ladders! Ordering is simple. Simply choose the FoldaMount46 package that best suits your needs and budget.

No more guesswork about which backboard and rim to choose. Compatibility is guaranteed!

Installing the FoldaMount46 is simple as well. The FoldaMount46 is specifically designed to provide wall-to-backboard extension distances from 4' to 6' during installation. This allows the unit to be "fine-tuned" to match the court markings on the floor. You will avoid costly rework and field modifications commonly caused by measurement errors.

Folding the unit is easy. Simply use the adjustment crank provided with

each unit to loosen the adjustment screw. Grab the rim with the hook on the crank and tug on the unit to slide it against the wall. Then tighten the adjustment screw to secure the unit. Reverse the process to set up for play! It's that simple!

Pick from First Team's broad array of package configurations to satisfy the needs of your facility. Remember, for additional safety, First Team offers optional bolt-on padding for most FoldaMount46 packages.

All FoldaMount46 packages come with a Lifetime Limited Warranty.

FOLDAMOUNT 46 PACKAGE OPTIONS
