STORAGE LOCKER

Perfect for temporary storage, these express lockers, unlike other small storage lockers on the market today, can be configured to your specific application. Utilizing an industry unique online configurator, easily choose desired number of rows and columns along with all specific features needed to design your own custom locker.

The small size of these lockers means they can be installed just about anywhere; choose from recessed-mount or surface-mount with a collar.

Convenient for any facility where cell phones are not allowed, this versatile solution can be used in large quantities at the main entrance or distributed throughout the facility.

If accessibility is required by management, a master door option allows easy access to all locker compartments within a unit.

## Mini - Standard Features

- Configure from 1 to 12 compartments high\* and 1 to 6 compartments wide
- 5-pin cylinder cam lock with two keys
- Clear plastic number slots
- 4" W x 5" H compartment doors
- 6-7/16" deep compartments
- Anodized aluminum finish
- Recess-mounted
- No master gate access

\***Note:** Maximum height for front access units is 10 compartments tall. Due to the combined weight of the front gate and locks, master door access is *not recommended* for units taller than seven compartments high when using locks other than the standard cam lock.

## Mini - Optional Features

- 3/4" high engraved numbers with or without black or white fill
- Architectural powder coat colors
- Engraved tabs or vision windows
- Compartment shelf padding
- 2-7/8" shallow depth compartments
- Surface-mount collar
- Master door\* for front gate access
- Lift-off or hinged rear cover access
