

Wireless Keypads

Honeywell

Portable Protection
at Your Fingertips

**Any wall.
Any tabletop.
Any time.**

Designed to be mounted on walls or placed on any tabletop, Honeywell's versatile wireless keypads provide easy-to-use portable protection you can count on. Whether you choose standard or talking versions, all of our wireless keypads take the guesswork out of security system operation and contain sophisticated, user-friendly features that put peace of mind, comfort and convenience at your fingertips.

Convenient, Portable Design

Compact and portable, Honeywell's wireless keypads travel with you, giving you the flexibility to place them anywhere in the home. Sleek and stylish, they are designed to blend with any décor and look perfect whether hung on the wall or placed on a tabletop. Some versions even contain contoured, removable doors—letting you choose the look you want.

Always in Touch

Ideal for busy households, the built-in message center lets family members record and playback voice messages for one another right at the keypad.

Security Made Simple

Guesswork is a thing of the past with Honeywell's wireless keypads. Easy to use and easy to read, they contain a host of convenient features that make security system operation simpler than ever.

Features include:

- One-touch operation, which lets you arm the system, turn lights on and off, send a page, display time or contact the police, fire department and other emergency response personnel with the press of a single button
- Large, bright displays that spell out system status in plain English
- Audible beeps that indicate system status, Entry/exit delays and other alarm conditions
- Comfortable, soft-touch keys labeled with simple commands and illuminated for easy nighttime visibility
- One-touch function keys that can be custom-programmed to contact the police, fire department and other emergency response personnel

We're Talking Technology

Talk about convenience! Honeywell's wireless voice keypads actually speak to you, providing security system status in plain, spoken English.

Exclusive Battery Saver Function

Should your wireless keypad "go to sleep" or shut off, the battery life is preserved.
