Create a button press notification for the ADC-VDB770

Users can create a button push notification using the *Notifications* page.

To create a button press notification using the Customer app:

1. Log into the Customer app.

2. Tap ≡.

3. Tap **Doorbell Camera**.

4. Tap ⚙.

5. Tap **Push Notifications**.

6. Tap **+ Add**.

7. Tap **Doorbell Call**.

8. Name the notification.

9. In *For the selected devices*, tap to select the desired doorbell camera.

10. In *When the following event occurs*, tap to select **Button Pushed**.

    Note: The ADC-VDB770 cannot use the motion selection to record on motion. The motion notification must be created in the Video Analytics configuration instead.

11. Optional customization:

    1. In *During this time frame*, tap to select **At all times** or **Only during the following times** to choose a schedule for the doorbell camera to follow.

    2. In *Notification filtering*, tap to select the desired filters.

12. Tap **+ Add recipients**.

13. In the *Address book,* tap to select the recipients to notify, or tap **+ New Contact** to add a new *Address Book* recipient.

    Note: It is recommended to use a push notification (i.e., recipients with a phone icon next to their description) rather than an email or text notification. Users can answer a doorbell call directly through the push notification.

14. At the end of the page, tap **Close**.

15. Verify the notification is configured with the correct settings.

16. Tap **Save**.

To create a button press notification using the Customer Website:

1. Log into the Customer Website.
2. Click **Notifications**.
3. Click **+ New Notification**. or click ✎ to edit an existing notification.
4. Click **Doorbell Call**.
5. In *For the selected devices*, click to select the desired device.
6. Click to select **Button Pushed**.

   Note: The ADC-VDB770 cannot use the motion selection to record on motion. The motion notification must be created in the Video Analytics configuration instead.

7. Optional customization:
   1. In *During this time frame*, click to select **At all times** or **Only during the following times** to choose a schedule for the doorbell camera to follow.
   2. In *Notification filtering*, click to select the desired filters.
8. Click **+ Add recipient**.
9. In the *Address book,* click to select the recipients to notify, or click **+ New** to add a new *Address Book* recipient.

   Note: It is recommended to use a push notification (i.e., recipients with a phone icon next to their description) rather than an email or text notification. Users can answer a doorbell call directly through the push notification.

10. Click **Close**.
11. Verify the notification is configured with the correct settings.
12. Click **Save**.
