

Penofin Oil Treatment Instructions

1. SHAKE WELL BEFORE USING. DO NOT add thinning or blending agents.
2. Apply Penofin to a clean dry surface. Surface must be free of dirt and sawdust build-up. Do not apply when wood is hot to the touch. Minimum temperature is 45 degrees Fahrenheit.
3. Brush on, use a stain pad, or spray on using a pump-up sprayer equipped with plastic tip.
4. To allow for maximum penetration wait 30 minutes, then use a nap-free shop cloth and wipe the entire surface, removing excess product.
5. Surface will be dry to the touch in three hours, and ready for use in 12 hours.
6. When using the one-coat formula, the application is now complete.
7. Do not apply wet-on-wet. Average coverage needed is 175-300 sq. ft. per gallon.
8. If using the two-coat formula, wait a minimum of three hours and apply a light second coat and again wipe any excess from the entire application area after 30 minutes.

NOTE: No stripping or sanding is necessary for maintenance. Just wash the surface with water and a mild detergent. Allow surface to fully dry for approximately 48 hours.

CLEANING: Use paint thinner or mineral spirits to clean up.

CAUTION:

- **Combustible** - keep this product away from heat, open flame, and sparks.
- Beware of spontaneous combustion. Make certain all rags or other materials used with Penofin are soaked in water, stored in an air-tight container, or otherwise disposed of safely.
- Avoid contact with skin and breathing vapor or spray mist. Use only with adequate ventilation. Do not take internally.
- If swallowed, do not induce vomiting. Call a physician immediately.
- Shelf life is limited once factory seal is broken. Secure lid tightly after each use.
