

Overview

The Simon XT™ Two-Way Talking Touch Screen is a color LCD screen featuring a user-friendly interface that offers complete control over Simon XT security systems. In addition, optional wireless devices can be added to provide control over other functions including Z-Wave® wireless lighting control devices and Z-Wave wireless thermostats for home HVAC systems. This touch screen is the ideal solution for providing an additional keypad, and up to four touch screens can be installed in one home for maximum convenience.

The touch screen's interface has been carefully designed to provide home status information at a glance that is intuitive and easy to use. The wireless device installs quickly with minimal disruption and works seamlessly with optional Alarm.com Web portal and mobile applications. These applications can provide additional lifestyle-enhancing information such as the current outdoor temperature and a four-day weather forecast.

Standard Features

- 3.5-inch color LCD screen with Graphical User Interface (GUI) delivers easy-to-understand information at a quick glance
- Wireless design facilitates quick and easy installation
- Simon XT compatible for added control of security system features
- Alarm.com compatible for advanced interactive services
 - Optional HVAC and lighting control devices with programmable options help promote energy savings
 - Four-day weather forecast adds value and lifestyle convenience
