

Can a CSVR record Alarm.com and third-party cameras simultaneously?

Yes. Any Pro Series Commercial Stream Video Recorder (ADC-CSVR2000P/2008P/2016P and ADC-CSVR2108P/2116P) or the ADC-SVR210 can record both Alarm.com and third-party cameras simultaneously as long as a supported networking topology is used.

For diagrams and information about supported network topologies, see the relevant SVR installation guide:
