

Can hybrid fire/intrusion panels be used with the Alarm.com Fire Communicator (ADC-FC100)?

The Alarm.com Fire Communicator (ADC-FC100) only supports fire alarm control panels (FACPs).

Hybrid panels may be used, but must be used for fire only. If the FC100 is connected to a hybrid fire/intrusion panel (e.g., Honeywell Vista 32FBPT and Vista 128FBPT), intrusion features (e.g., remote arming) will not be available.
