## Create a Video Analytics notification for the ADC-VDB750

Users can create notifications for the ADC-VDB750 during its Video Analytics configuration. If the Video Analytics rule is already created, edit the rule to reconfigure notifications.

**Note:** The ADC-VDB750 motion notification is sent to the user immediately after the device identifies a person.

### To create an ADC-VDB750 Video Analytics notification

#### To create an ADC-VDB750 Video Analytics notification using the Customer Website: ^

1. Log into the Customer Website.
2. Click **Video**.
3. Click **Recording Rules**.
4. Click **New Recording Rule**, or click ✎ to edit an existing notification.
5. Click **Video Analytics**.
6. Click to select the ADC-VDB750.
7. Click **Next**.
8. In *Notify Recipients*, click to select the desired users to be notified.
9. Configure the rest of the rule as desired. For more information about how to configure a Video Analytics rule, see [Configure Video Analytics rules](#).
10. Click **Save**.

#### To create an ADC-VDB750 Video Analytics notification using the Customer app: ^

1. Log into the Customer app.
2. Tap **Video**.
