

How does the Video Doorbell Wall Power Supply Kit work?

The Video Doorbell Wall Power Supply Kit (ADC-VDBA-PSU-DC) is a DC plug-in power supply rated at 16V, 1.25A (20W). The Video Doorbell Wall Power Supply Kit is designed to easily power the ADC-VDB750 when not using an existing chime circuit. This supply can be used for installations where there is no existing wiring or where the existing setup is incompatible.

Important: The Wall Power Supply Kit cannot be used for digital chime installations.

Installation and wiring

Required materials

- 18-20 gauge wires for the power supply

Wiring diagrams

There are no polarity requirements for this configuration:
