

Can the ADC-W110 be connected to a Wi-Fi extender?

Yes. However, the ADC-W110 is only compatible with certain Wi-Fi extenders due to how some extenders are designed. Alarm.com has performed extensive testing on many Wi-Fi extenders to find models that consistently perform well with the ADC-W110, and Alarm.com has identified two specific extenders that reliably hold a connection with the ADC-W110.

Recommended Wi-Fi extenders for the ADC-W110

Important: It is recommended to connect the ADC-W110 directly to a router or access point. A direct connection provides the most consistent and reliable experience. If possible, try moving the ADC-W110 closer to the access point if the two are not within range.

- Linksys AC1200
- TP-Link TL-WA850RE

Known incompatible Wi-Fi extenders for the ADC-W110

- TP-Link N300
- Netgear EX3700
- Netgear EX2700
- Netgear EX7500

This list contains Wi-Fi extenders that are tested and known to be incompatible. Extenders other than the recommended models are also likely to provide inconsistent connectivity.
