Uplink CDMA50

CDMA ALARM COMMUNICATOR

FULL DATA/DIAL CAPTURE

The Uplink CDMA50 delivers full-event reporting and complete end-to-end signal verification for primary cellular communications or as a backup to land line connections. It uses the industry standard CDMA network, is compatible with virtually all security system panels and supports all common event reporting formats. Installation is remarkably easy, with no additional programming or central station equipment required. Instant onsite activation is available through the Uplink dealer website or live operator.

KEY FEATURES:

CDMA technology - not subject to 2G sunset.

Backup or primary cellular alarm/full event reporting

Contact ID, SIA, Modem Ile/Illa/Illa², or Pulse 4/2 (:10, :20, or :40 PPS) Formats

Installs in minutes with complete end-to-end signal verification

Instant activation by secure dealer website or live operator

uplink CDMA50

A TRUSTED PARTNER

The Uplink CDMA50 is a member of the Uplink family of wireless alarm communicators. Our products deliver the unique combination of reliable technology and superior value that has made Uplink the security industry's most trusted source for alarm communicators since 1996. GSM or CDMA protocols, primary or back-up applications, summary or full data reporting, there is an Uplink wireless alarm communicator for virtually any security system on the market today. With hundreds of thousands of installed communicators throughout the United States and Canada, Uplink delivers on its promise as the security dealer's trusted partner.

Plus, Uplink wireless communicators are backed by the unique combination of the proprietary ISO-27001 certified network service offering and a dealer web management tool.
