Security that covers
everything – in a size
that doesn't.

GE DesignLine wireless
home security products
shown actual size.

Wireless security – thinking big
leads to something small.

less is more

The GE DesignLine wireless security products represent the latest technology for reliable and convenient home security. Their unique design offers the smallest, most unobtrusive wireless security sensors in the industry. And because the GE DesignLine security sensors are wireless, that means less install time, less cost and more options for sensor locations. All in all, there has never been a more flexible, complete offering for home security.

GE DesignLine Flat Wall Touchpad

- Wireless technology is easier and less costly to install; flexible placement increases safety
- Flat wall design – sleek modern look fits in any room
- Arms/disarms systems wirelessly – activates police or auxiliary panic alarm and turns lights on and off
- Compatible with all GE Security 319.5 MHz control panels and receivers

GE DesignLine Slim Door/Window Sensor

- Low-profile design and modern look
- Advanced circuit technology supplies robust function with low current draw
- Range function up to 500 ft.
- Runs on lithium coin cell battery; typical battery life 5 years
- Tamper-resistant case improves security and durability

GE DesignLine Keyfobs

- Compact size fits easily in a purse, pocket or on a keychain
- Easy touch control acts as electronic key
- 2-Button – arms and disarms systems wirelessly
- 4-Button – arms and disarms systems wirelessly; activates police or auxiliary panic alarm; turns lights on and off
- 5-Button with flashlight LED – arms and disarms systems wirelessly; activates police or auxiliary panic alarm; turns lights on and off; bright-white LED flashlight

don't make it hard

There's a reason they call it hard-wiring. You have to drill holes and pull lines. It can take up to four times longer to install. You're limited as to where sensors can be located.

The GE DesignLine wireless security sensors have never been easier to use. The Wall Touchpad easily mounts to any wall for convenience, and comprehensive functionality allows for remote connectivity: arm/disarm; activate police alarm; auxiliary panic alarm; and turn lights on and off.

With a sleek, modern look and feel, the GE DesignLine wireless security sensors provide the highest level of intrusion protection for doors, windows, cabinets or anything that opens and closes.

performance

METICULOUSLY ENGINEERED FOR YEARS OF ROBUST AND TROUBLE-FREE OPERATION

FEATURING ADVANCED CIRCUIT TECHNOLOGY WITH EXTREMELY EFFICIENT AND RELIABLE SENSORS

HIGH-CAPACITY LITHIUM BATTERY MEANS FEWER BATTERY CHANGES IN LOW-TRAFFIC AREAS
