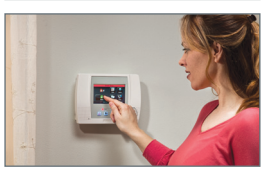
iconic



Introducing Honeywell's LYNX Touch...the hottest new industry icon.

The industry's most popular self-contained control now features a large, full-color touchscreen with brilliant graphic icons that make operation and programming a snap. LYNX Touch helps you win more business by offering today's consumers what they really want…information and control at their fingertips. You'll spend less time training end-users as well as new and experienced installers. The innovative touchscreen is great for new installs and upgrades—letting you provide next-generation interactive security as well as RMR-generating services like Total Connect and two-way voice over GSM. Best of all, you'll have the power and stability of Honeywell behind you.

Incredibly innovative. Surprisingly simple. LYNX Touch.
