If you are not able to find what you are looking for, please visit our website [www.millernets.com](http://www.millernets.com) for a complete selection of all your fishing equipment and supplies. Our website is always up-to-date and has current pricing. You can also call us at 1-800-423-6603, or email [miller@millernets.com](mailto:miller@millernets.com) if you need additional assistance.

*"I have personally used every type of net in our catalog, and have fished these nets under diverse and wide-ranging conditions. Drawing on decades of experience, I only build properly balanced, efficient nets. Please feel free to contact me if you have any questions."*

– Harold Miller, President

**MILLER NET COMPANY, INC.** specializes in custom nets. We are a manufacturer of nets. Our hand-crafted nets are built in our net shop located in Memphis, Tennessee. We are a family business with a product line developed from four generations of experience.

## HOW DOES THIS BENEFIT YOU, THE CUSTOMER?

**Competitive Prices.** Because we are a manufacturer, we are able to offer our quality nets at very competitive prices—you are buying direct, not from a middleman.

**Fast turnaround on orders.** We keep a large inventory of bulk material on hand and therefore are able to ship quickly.

**Quality workmanship.** All of our skilled net builders have years of experience in the art of properly hanging nets. We use only the finest materials in our nets—no seconds or inferior netting is ever used. **Miller Net Company** never substitutes material without your permission. You receive what you ordered - guaranteed.

**Professionally-trained sales staff.** All of our salespeople are knowledgeable, courteous, and happy to answer any questions you may have. We take a great deal of pride in our attention to service. Whether you are an individual or a large corporation, we are happy to help with your individual customer needs. Whether you know exactly what you need down to the stock number from our catalog, or if you only have a general idea of the size and purposes of the net you want, we can help.

We believe that the combination of our fast service, quality workmanship, competitive prices, and friendly staff, means that **Miller Net Company** is your prime source for nets. Please contact us with your needs, and we will furnish you the right net at the right price the first time.

# HOOP NETS

**HOOP NETS** (also known as fyke, barrel, or fiddler nets) are one of the most common stationary nets used in commercial fishing. Hoop nets are tubular shaped nets with a series of hoops or rings spaced along the length of the net to keep it open. To fish a hoop net, the net is staked out in a body of water and bait is placed in the closed or tail end of the net. Attracted by the bait, the fish swims through the open end, swims through two funnel shaped throats and is captured in the tail end of the net. The net is then lifted out of the water and the catch is emptied. The hoops themselves are usually constructed out of fiberglass and are either round (most common), square, or D-shaped.

As a manufacturer, **Miller Net Company** is in a unique position to offer you the finest hoop nets available. Not only do we hand hang each hoop net, every net has the following features:

▶ **Two Finger-Style Throats** are used on the second and fourth hoop of each net. This superior construction allows fish to swim inside the net easily, but once inside they are securely trapped. Our finger throat design makes it easy to lift a full net without losing any fish.

▶ **Our nets are fully hung** with only first quality netting and twine to give you a balanced and effective net. Please contact us for details on the construction of our hoop nets.

▶ **We use a premium black coating** on our nets- not the cheap "asphalt" tar that some companies use which never dries and always bleeds on everything it touches. Our net coating prevents deterioration of the net by protecting the net strands from sunlight, moisture, and chemical contamination. We provide net coat protection at no additional cost, considerably extending the life of each net we sell.

We are one of the very few manufacturers in the United States that produce fiberglass hoops in our factory (most other companies buy their hoops). You are buying direct from the factory, not a middleman.

▶ We also make hoop/trap nets out of very small mesh netting from 1/2"sq. to as small as 1/32"sq. We can make the net you need for your research. **CALL US FOR A QUOTE!**

## THE "SPORTY" HOOP NET

These quality hoop nets are manufactured with the same fine materials and concern for details that we use in our full-sized hoop nets. "Sporty" nets are shorter in length, have smaller diameter hoops, have fewer hoops, and are somewhat easier for the novice to use. "Sporty" nets are perfect for the week-end fisherman - small, compact, and yet quite effective. Listed below are our standard "Sporty" nets, all of which have fiberglass hoops and black netcoat treatment.

- ▶ **Four 20" Dia. Mini Fiberglass Hoops**
- ▶ **Two Throats - Back has Flat Opening**
- ▶ **May be Fished Horizontal or Vertical**
- ▶ **Web Twine Size #15, Length 20"**

DISCOUNT OF 5% FOR PURCHASES OF 3 OR MORE NETS.

## LEADS & WINGS FOR HOOP/TRAP NETS

Leads and wings are nets (similar to drag seines) which act as a visual and physical barrier which herds or guides fish to your hoop/trap nets, and should be at least as deep as the diameter of your hoop/trap net.

Listed below are our standard leads and wings. If you need a size not listed, please contact us.

### NET DIP

Our full-strength Net Dip is a synthetic water-based liquid that is used to protect and dye netting. Our state-of-the-art dip will protect nets from abrasion, ultra-violet damage from sunlight, as well as prevent knots from slipping under stress. Used primarily on seines, trawls, sports nets, or any net that is used outdoors. Available in **BLACK**, **GREEN** or **BLUE**.

STOCK#	NET DIP	
ND5	5 GAL.	\$85.00
ND55	55 GAL.	\$750.00

### NET COAT (TAR)

Netcoat has been used by commercial fishermen for generations to treat their nets. Our premium netcoat fully coats the fibers of the netting and reduces damage from abrasion, sunlight, dirt, and overall weathering. Best yet, our netcoat dries completely while maintaining flexibility. Do not be fooled by cheaper made netcoat that some companies carry—the best costs less in the longrun.

STOCK#	NET COAT

## COLLAPSIBLE MINNOW TRAP

Built with a spring pop-out design, these traps open automatically in one quick step and fold for easy storage. Durable netting. 10" diameter x 19" long. 1/8" mesh. Comes 4 to a case.

**Stock# 20005** ..... \$7.50 ea.

## WHITE PLASTIC MINNOW TRAPS

Constructed of sturdy but smooth durable plastic, these traps are rust-proof for years of service. Made in two parts and snap together. 16-3/4" long x 8-3/4" center diameter with 3/16" long sq. openings. Weight 1 lb.

**Stock# 50176** ..... \$12.75 ea., \$11.00 ea. - 24 per carton

## BREAM / PERCH BAIT TRAP

20" x 20", 1/2" mesh galvanized wire. Great for catching bream and bait fish.

**Stock# BPB** ..... \$48.00 ea.

## COLLAPSIBLE FISH & CRAB / CRAWDAD TRAPS

Becoming widely used by professionals, commercial fisherman, and scientific groups to catch fish and crustaceans. Unlike other traditional traps, their collapsible design allows fishermen to carry more traps while eliminating excessive bulk on board. All traps include a bonus drawstring bait bag, wire secure clamps and easy carry handle.

### NYLON LIVE NETS

Nylon bags or nets are a popular method to store live fish. Our live nets have two steel or fiberglass hoops, and are made of #15 nylon netting. We have several sizes available which will accommodate anything from bait fish to pan-sized fish. Our floating live bags have enough floats on the top hoop so that the bag will always float – no matter how many fish are in the bag. All of our live bags have drawstrings at the top.

Premium, **BLACK** netcoat treatment—add \$5.00 per net. **BLACK** or **GREEN** net dip—add \$6.00 per net. Floating—add \$20.00 per net.

# CAST NETS

Cast nets, also called throw nets, are one of the oldest and most widespread types of net used in fishing. Cast nets are nets that are thrown or cast into the water. When thrown, the net opens up in a large flat circular shape and sinks quickly to the bottom. The net is then pulled up out of the water and the catch is emptied. Cast nets are used to catch bait fish, shrimp, and pan sized fish. Cast nets are very popular with the commercial fisherman as well as the sport and weekend fisherman.

**Miller Net Company** offers the widest selection of cast nets currently available. From the price-conscious individual looking for a net for occasional use, to commercial cast netters or professional guides we have it all. We offer various material types, colors, sizes and specifications to catch bait, shrimp, and pan sized fish. Our fast-opening nets come with detailed how-to-throw instructions.

## INSTRUCTIONAL VIDEOS

Miller Net Company offers a video that shows how to throw a cast net. "The Art of Castnet Throwing" is an interesting and informative hour long video that shows different methods of cast net throwing in various locations, and also how to select areas of water to increase your catch. **\$18.95 ea.**

## E-Z THROW CAST NETS

FITEC Super Spreader™ has developed a new cast net for the beginning cast net user that practically opens itself every-time you throw it. The secret to the ease of use in the new EZ THROW™ Super Spreader™ Cast Nets is its patented ac-curthrow ring. The aluminum ring at the top of the net displaces centrifugal force evenly to the cast net ensuring it will open correctly every time.

- A Horn & Spacers** are plastic circles attached to top of net.
- B Braille Lines** are single lines of netting connecting the net through the hoop and into throw line.
- C Bullseye** is non-flared section of net to control throw and opening.
- D Leadline** is rope line along bottom of net.
- E Braids** are spaces between weights with 2 or more ties.
- F Weights** are either lead or plastic coated steel.

Catching your own bait and shrimp is now easier than ever! No more complicated techniques or difficult maneuvers.

The aluminum ring helps you learn perfect casting extremely fast. Three easy steps and a few minutes of practice will have you netting fresh shrimp and fish by the pound. Throwing the net like a frisbee or discus helps spread the net open for a wider and better catch.

### E-Z THROW™ 750 SERIES

- ▶ Perfect as a starter net or for occasional use
- ▶ Available in monofilament netting (similar to the twine used on rod and reels) and also in white multifilament nylon
- ▶ A full 3/4 lb. of lead per radius foot—sinks quickly
- ▶ High count heavy duty 80 lb. test braile lines—strong secure closure on retrieval
- ▶ 20-foot floating handline
- ▶ Economically priced

RADIUS	3/8" MONO-CLEAR		
	STOCK #	EACH	CARTON

# FLAG GILL NETS (SHIRT TAIL NETS)

Flag nets are the least expensive of the gill nets, but when used in still water and little or no wind, they are still quite effective in catching fish.

Flag nets are constructed out of multifilament or monofilament gill netting with a small rope at the top. There are no floats, leads, or bottom rope.

The net is fished by tying it between trees, stakes or jugs. As the fish approaches the net, the water displaced by the

fish's movement causes the netting to swirl, catching the fish through gilling or tangling. Flag nets are not recommended in moving water or in windy conditions.

Our flag gill nets are hung with a 36 top line. All nets are fully hung with 200 stretch yards of netting per 100 stretch yards of finished net.

▶ Prices below are based on 300-ft. nets.

▶ Less than 300 ft. add \$2.00 per net.

miller@millernets.com

## FISH PICKS

Used primarily by gill netters for removal of fish.

**STOCK# FP** ..... \$5.85 each

12 or more ..... \$60.00

## GILL NETS

Gill nets are the most popular commercial fishing net worldwide. There are many variations of gill nets, but there are normally three different types of netting commonly used.

### Multifilament nylon netting

is normally white in color and is composed of many very small filaments twisted together. Multifilament nylon netting is very strong, limber and soft, and can be dyed. This netting works very well at night and in dark water, but tends to pick-up debris in the fibers of the netting.

**Monofilament nylon netting** is composed of single strand similar to the twine used in a rod and reel. Monofilament nylon netting is extremely effective in clear water and during daylight hours, does not collect much debris in the fibers of the netting, but is somewhat stiffer than multifilament nylon netting.

**Multi-Strand Monofilament netting** is a cross between multifilament nylon netting and monofilament nylon netting. Multi-strand netting is composed of 3 to 12 strands of monofilament twine loosely twisted together. Multistrand monofilament is softer and more flexible than monofilament netting, and is more effective in clear water than multifilament netting.

Regardless of the netting material used, all of Miller Net Company's gill nets are manufactured with close attention to details, and quality ropes, floats, and twines. All of our gill nets are **sinking style** gill nets unless otherwise ordered.

Listed below are options available for our fine lead and float gill nets:

- ▶ 3/8" foamcore floatline (eliminates external floats) **add \$10.00**
- ▶ 1/2" foamcore floatline **add \$17.00**
- ▶ 3/16" braided poly rope tied parallel to the floatline **add \$8.00** (reduces stretching of the floatline)
- ▶ #30 leadcore (eliminates external leads) **add \$20.00**  
Approximately 30 lbs. per 600 feet
- ▶ #50 leadcore (eliminates external leads) **add \$30.00**  
Approximately 50 lbs. per 600 feet
- ▶ 1/4" braided poly top and bottom lines **add \$10.00**
- ▶ Extra Mesh per tie (even fuller netting to catch better)
- ▶ 1" stretch - 2" stretch **add \$15.00**
- ▶ Greater than 2" stretch **add \$12.00**
- ▶ Coastal Rigged Nets **add \$100.00**  
(very heavy duty floats, leads, and ropes)

## POLYFOAM FLOATLINE

Floatline is a specialty rope used primarily with gill and trammel nets. It has a polypropylene jacket braided around a "foam" center or core. Floatrope eliminates the need for external floats on "sinking" type nets. It is often used with lead-core bottom rope.

STOCK#	DIA.	SPOOL LENGTH	PRICE / SPOOL

## MULTIFILAMENT NYLON GILL NETS (LEADS & FLOATS)

Our Lead and Float Gill Nets come completely with top and bottom ropes, leads, floats and are ready to use. All of our gill nets are tied with bonded nylon twine so that there are no slipped knots, ultraviolet treated ropes, and of course we use only first quality netting in our nets – at least a full 600 stretched feet for every 300 foot hung net. All nets are sinking type nets unless otherwise ordered.

- ▶ Prices below are based on 300-ft. nets.
- ▶ Less than 300 ft. add \$5.00 per net.
- ▶ Less than 100 ft. add \$12.00 per net.

# TRAMMEL NETS

Trammel nets are one of the most complex, yet efficient gill nets that are in popular use worldwide. Unlike single wall gill nets, which will catch a narrow range of fish sizes, a trammel net will catch a wide variety of fish sizes. Essentially, a trammel net is three layers of netting tied together on a common floatline and common leadline. The two outer layers of netting (known as walls or brails) are constructed out of large mesh netting (12" to 18" square) with a twine size of #9 multifilament nylon or .81mm to .90mm monofilament. The lightweight or fine netting sandwiched between the two walls is usually small mesh multifilament or monofilament gill netting. Trammel nets have a large amount of lightweight gill netting hung in the nets, and fish will be caught by gilling or by tangling in the excess netting. These efficient nets can be fished floating or sinking, and stationary or drifting.

Miller Net Company's trammel nets are the end result of many years of personal hands-on experience and are second to none. By using only the finest quality materials, and close attention to details, we can honestly state that our trammel nets are among the best value you can expect in a fishing net. We hang plenty of extra netting in length and in depth. The walling (or brails) in our standard nets are constructed out of #9 twisted multifilament nylon netting. All nets are completely hung, ready to use and are **sinking type** unless ordered otherwise.

Listed below are options available for our fine lead and float gill nets:

- ▶ 3/8" foamcore floatline (eliminates external floats) **add \$10.00**
- ▶ 1/2" foamcore floatline **add \$17.00**
- ▶ 3/16" braided poly rope tied parallel to the floatline **add \$8.00** (reduces stretching of the floatline)
- ▶ #30 leadcore (eliminates external leads) **add \$20.00**  
Approximately 30 lbs. per 600 feet
- ▶ #50 leadcore **add \$30.00**  
Approximately 50 lbs. per 600 feet  
65 lb. per 600 feet **add \$63.00**
- ▶ 1/4" braided poly top and bottom lines with lead inserts **add \$12.00**

- ▶ The prices listed below are for 300-foot nets.
- ▶ Nets less than 300 feet add \$7.00 per net.
- ▶ Less than 100 feet, add \$14.00.

# SEINES

## KNOTTED NYLON SEINE

Our hand-crafted quality nylon drag seines are completely assembled and ready to fish. Simply take the seine out of the box and begin fishing. We use only the finest bonded and stabilized nylon netting, sturdy floats, and strong ropes. Our standard seines have a single top poly rope and double bottom poly ropes. The heavy duty floats and leads ensure that the seine has strong flotation to always stay on the surface no matter how deep the water.

### ► Larger top and bottom ropes (only on knotted seines):

3/8" single top and double bottom ropes ..... **Add \$.3 per ft.**  
 1/2" single top and double bottom ropes ..... **Add \$.5 per ft.**

## SMALL MESH NYLON SEINES

(FOR BAIT SIZED FISH SUCH AS MINNOWS, SHINERS, SHAD, ETC.)

Our small mesh seines are fully hung with a generous amount of soft, non-abrasive nylon netting. Our superior netting is strong, yet soft enough to reduce injury to delicate fish. Our seines are completely assembled with floats and leads and are ready to use.

## BAGS FOR NYLON SEINES

Listed below are prices for bags for nylon drag seines and small mesh nylon seines:

BAG SIZE	PRICE
4 x 4 x 4	Same as 20 ft. of seine
6 x 6 x 6	Same as 30 ft. of seine
8 x 8 x 8	Same as 40 ft. of seine
10 x 10 x 10	Same as 50 ft. of seine

**EXAMPLE: 50 FT. X 4 FT. SEINE WITH A 4 X 4 X 4 BAG  
 WILL COST THE SAME AS SEINE 70 FT. LONG (50 FT. + 20 FT.)**

## NETTING MUDLINE

Constructed out of multiple stands of synthetic rope, tied together to form a cable-like rope used as a bottom line on drag seines. This unique rope soaks up water and helps keep the net on the bottom, but also prevents the net from cutting into soft mud. **\$1.25 per foot.**

## COMMON SENSE MINNOW SEINES

Made of 100% polyester netting, sewn with nylon thread and has nylon rope—approximately two feet long, at each corner—for fastening the poles.

The corners of the seine are reinforced by a rolled-over edge which smoothly bonds the cord together with the net. Each seine is 4-ft. deep and comes complete with floats and leads.

STOCK #	MESH SIZE	LENGTH OF NET

## UMBRELLA DIP NETS

A great bait catching dip net. Features strong Ace Nylon netting on a galvanized steel frame. For easy operation, its spring-loaded frame pops the net open for use and folds completely in one quick step. Specially designed hemmed edges insure your catch will stay in the net. Complete with 25-foot rope.

**UDN-201** 42" x 42" Black 3/16" Mesh Netting ..... \$14.50  
**UDN-202** 36" x 36" Black 3/16" Mesh Netting ..... \$12.95

## LANDING / DIP NETS

ADDITIONAL HANDLING

### Stock# HDDNSF Heavy Duty Dip Net (Square Front)

18"x21" bow has steel guard, hand grip, 7/8" sq. #42 polyethylene netting with 2" steel ring, and 40" steel handle. Weighs 7-1/2 lbs. **\$75.00 each.**

### Stock# HDRN Heavy Duty Replacement Net

#42 poly 7/8" sq. mesh with 2" steel. Will fit Stock#HDDNR and #HDDNSF **\$30.00 each.**

### Stock# FDN Fingerling Dip Net

15"x18" bow with 10" deep, 31" steel handle, steel guard rail, hand grip, 1/4" sq. heavy knotless netting, treated. **\$50.00 each.**

## SWING LANDING NET

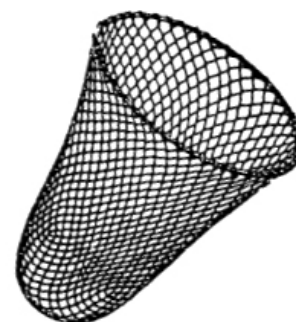

The Swing Landing Net is designed for a quick single-handed performance with just a flip of the wrist. When not in use, the net folds compactly to 22" and with a quick swing it extends to nearly 42" in length. Constructed with durable light-weight aluminum and a soft grip handle.

**LN-301** 20" x 17" hoop. Nylon netting. .... **\$21.50**

## SHAD TRAWLS

An excellent net for scooping shad to use as bait. Shad trawls are made from nylon netting with a galvanized hoop, 4-foot brail lines and a 35-foot tow line. The bottom is made slightly flat so that the shad are not mashed into the bottom and pressed through the mesh. Brail and tow lines are #84 braided nylon.

**SHIPPING:** In an effort to provide the convenience and lowest cost of shipping, we ship the larger nylon shad trawls to you unassembled. To assemble, insert hoop into coupling provided and attach to other end of hoop. Strike coupling on hard surface with hammer to press coupling firmly against hoop.

# TWISTED NYLON NETTING (MULTIFILAMENT) / WALLING

Twisted nylon netting is one of the most common and versatile types of netting used. It is very strong, easy to work with, easy to repair, and is resistant to most chemicals and water. This netting is widely used in commercial fishing for seines, pound nets, hoop nets, trap nets, as well as industrial and sports nets. We use only 100% virgin nylon fiber that after twisting has been bonded and stabilized for knot holding ability and strength. The treatments listed below are available:

- ▶ **Netcoat (tar)**—increased abrasion and ultra violet protection (black color) add \$1.50/lb. Less than 10 lbs. add \$0.50/lb.
- ▶ Plastic Net (available in **GREEN**, **BLACK**, or **BLUE**. Please specify.)
- ▶ \$20.00 minimum charge for the above treatments.

## TWISTED NYLON NETTING (MULTIFILAMENT)

Nylon gill netting is white in color, very soft, easy to hang and repair, and works very well at night or in muddy water. Nylon gill netting has been used successfully by commercial fishermen for several decades in all types of fisheries. All of Miller Net Company's gill netting is 100% virgin nylon fiber and is double selvage for strength.

The depth in feet shown for all of the netting listed below is calculated on a "1/2 basis". (200 stretch feet needed for every 100 feet of hung in netting)

Pricing: PRICES ARE "OF A SIZE". (Same size mesh, depth, and twine). **If multifilament netting is ordered in pieces under 5 lbs., use the 5 thru 24 lb. price plus a \$3.00 cutting charge for each piece.**

WHEN ORDERING  
NETS OR NETTINGS  
BE SURE THEY ARE  
THE MESH YOU NEED:

Square measure is one-half of stretch measure.

Both square and stretched measurements in our catalog are based on standard method of measurement—from center of knot to center of knot.

# MONOFILAMENT NYLON GILL NETTING

Monofilament nylon gill netting (sometimes known as glass) is the most common type of gill netting in the United States. This netting works very well in clear water and in daylight hours. Although monofilament netting is stiffer than multifilament nylon netting, and is more difficult to repair, many fishermen prefer monofilament netting because it is almost invisible to fish.

We sell the finest monofilament gill netting available. Our netting is strong, soft, double knotted and double selvage for strength. If you have trouble deciding which netting you need or how much you need please call us.

The depth in feet shown for all of the netting listed below is calculated on a "1/2 basis" (200 stretch feet needed for every 100 feet of hung in netting).

**If monofilament netting is ordered in pieces under 5 lbs., use the 5 thru 24 lb. price plus a \$5.00 cutting charge for each piece ordered.**

GB126	#16	1/2"	600'	2500	75.00

## SOLID BRAIDED

This rope is braided throughout and has no core. It is round with a smooth surface, will sink in water, is somewhat stiff, and is very strong. Often used in pulleys or where tough, abrasion-resistant rope is needed.

STOCK#	SIZE	DIAMETER	SPOOL LENGTH	APPROX. TEST LBS.	PRICE PER SPOOL
SBN43	#4	1/8"	300'	500	\$15.00
SBN46			600'		24.00

SBN163	#16	1/2"	300'	4300	92.00
SBN166			600'		179.00

## DIAMOND BRAIDED NYLON

Not quite as smooth or strong as solid braided nylon, this rope is more flexible, particularly in cold water. It has a core in the center, will sink in water and is resistant to most chemicals. Commonly used where strength and flexibility is required.

STOCK#	SIZE	DIAMETER	SPOOL LENGTH	APPROX. TEST LBS.	PRICE PER SPOOL
DBN43	#4	1/8"	300'	470	\$13.00

LC65	5/16"	65	135.00	271.00	—

## FLOATS

Select from a complete line of floats including hard plastic, sponge and hard foam. Remember: to enable the float to slip over the rope, the hole diameter should be about 1/8" larger than the diameter of the rope.

## ACCESSORIES / MISCELLANEOUS

### 2-SPEED BAIT AERATOR

Quiet and water-resistant sealed. The internal piston is controlled by a 2-speed switch. HIGH allows for maximum aeration, while LOW conserves battery life. Runs for 30 hours on 1 "D" battery. Includes 2 sets of tubing and airstones.

**Stock # AC-710** ..... \$10.25 ea.

### MESH BAG (24" X 30")

These multi-use bags are made of strong nylon mesh with cord-lock drawstring closure. Washing machine safe. Mildew and rot resistant.

**Stock # NE-302** ..... \$5.50 ea.

### SOLAR TURTLE TRAP

Made with durable galvanized steel mesh, the trap won't rust, rot or corrode. Turtles walk up ends and into the basket.

**Stock # STT** ..... \$88.50 ea.

### WIRE FISH BASKET

Fully collapsible, these wire baskets feature spring-loaded trap doors on top and bottom for easy loading and unloading of your catch. Floating lid. 14" diameter x 24" high x 5/8" wire mesh.

**Stock # AC-203** ..... \$8.50 ea.

### SHAD & SMELT NETS

With an Ace-type nylon bag 1/4" square mesh, 24" deep, features a D-shaped 18" aluminum hoop with a 45" wooden handle.
