

INDUSTRY FAN

Polished Copper, Galvanized or Rust. Optional light with opal shades (open or closed) and halogen or energy-saving compact fluorescent lamping.

The period spanning 1880 through the beginning of the Great War represented the awakening of the age of the engineer in America. The country had been spanned by the railroad, the Brooklyn Bridge completed and skyscrapers were just around the corner.

Although contrary to the Crafts Movements, the Industrial Age was to have an indelible impact on the products in America.

Our Industry fan represents the pragmatic design of the era: No frills of decoration, just the function expressing itself as form.

In keeping with its self-evident design, the Industry fan is offered in a rough galvanized finish, a textured rust faux-finish and a carefully polished plated copper luster.

Modern motor design, energy-saving light options and electronic controls insure that this century-old look fits your home of today.

Polished Copper

Galvanized

Rust

Open Light

Closed Light

Includes 2" and 9" down rods, yielding 17" and 24" overall length

Product Information

finish	blade diameter	blade color	Light Option	control option
